

dNTP Mix (RNase-free)

Item N°: NB-03-0137

Kit Content

NB-03-0137	
Concentration	10 mM each
Size	0,5 ml

Storage And Stability

Store at -20°C.

Description

dNTPs are aqueous solutions at pH 7.0 containing dATP, dCTP, dGTP and dTTP, each at a final concentration of 10 mM. dNTPs are ready-to-use solutions designed to save time and to provide higher reproducibility in PCR and other applications. The Mix offers the possibility to reduce the number of pipetting steps and the risk of reaction set up errors.

Application

For use in all molecular biology applications, including PCR, long PCR, real-time PCR, high fidelity PCR, RT-PCR, cDNA synthesis, primer extension and DNA labeling.

Quality Control

Functionally tested in PCR with Taq and Pfu DNA Polymerases.

Greater than 99% purity of each component confirmed by HPLC.

Free of endodeoxyribonuclease, exodeoxyribonuclease, ribonuclease and phosphatase activities.
