We're on team histotech.

You have a lot on your plate, with a lot to keep straight—early mornings, limited resources, pressure to get results exactly right—and occasionally celebrating a tissue block that smiles back at you. We see you, and we've got your back.

You can depend on StatLab to get you the high-quality products you need on time and within your budget so you can spend more time on patient care instead of juggling multiple suppliers. You're the reason we've expanded to manufacture a wider variety of products.

And when you need help? We have an expert support team available anytime— whether that means help matching a stain or optimizing products to meet your needs. We're on your team.

Delivering value through expanded manufacturing.

TEXAS | WALES | ENGLAND The addition of Pyramid Innovation and CellPath to the StatLab family of companies means we're now manufacturing more products than ever to bring you a wider selection of supplies crafted for consistent accuracy, supported by a team of pros who've worked in labs like yours. We're *all* on your team.

McKinney and Arlington, Texas

StatLab has a long history of manufacturing high-quality prefills, reagents, stains and more at StatLab global headquarters in McKinney, Texas. A new injection molding manufacturing center in Arlington, Texas houses cassette manufacturing, a future sample archiving solution, and more.

Polegate, England

PathSmart tracking solution manufacturing and development—including the PiSmart cassette and slide printers—takes place in Polegate, England, led by the experienced, innovative team who developed the original cassette printing technology.

Newtown, Wales

CellPath has manufactured cassettes and histology products for the UK and around the world for over 40 years, developing innovative archiving solutions and products to make it easier for labs to deliver accurate results.

Fixation and specimen transport

A complete line of specimen transport products to ensure patient samples arrive in the best possible condition.

Ask your sales rep about customized prefills, bags, and kits to help you promote your lab and grow your business.

Prefills

SC StatClick™ containers produce an audible “click” when the leak-proof seal has been properly engaged, assuring accurate closure and maintaining specimen integrity during transport.

10% Formalin

Formalin, 10% Neutral Buffered pH 7.0

HistoPaks

Formalin Alternatives

ExCell Plus™

ExCell Plus™ is a tissue fixative is a low-hazard alternative to 10% formalin—and the only tissue fixative that actually smells pleasant! ExCell Plus™ contains no heavy metals, and penetrates most tissue specimens as fast as 10% Formalin.

| | | |
|-----------------|------------|----|
| 20 mL, 96/case | FXEXP20CS | SC |
| 120 mL, 48/case | FXEXP120CS | SC |
| 250 mL, 12/case | FXEXP250CS | |
| 1000 mL, 6/case | FXEXP1KCS | |

Michels Solution

Michels Solution is used to preserve and transport specimens for examination in immunofluorescence studies. While not a fixative, specimens can be held at room temperature for five days in transport medium before processing. This simple salt solution maintains pH, but does not kill most pathogens. Specimens received in transport medium should be washed in three changes of Michels Wash Solution (10 minutes for each wash). Not suitable for FISH studies.

| | | |
|--------------------------|-----------|----|
| 7 mL container, 100/case | MS0735 | |
| 20 mL container, 24/case | MS0507/24 | SC |
| 20 mL container, 96/case | MS0507 | SC |

WASH SOLUTION

| | | |
|------------------------------|-------|--|
| Michels Wash Solution, 32 oz | MS-32 | |
|------------------------------|-------|--|

Additional Formalin Fixatives

Formalin, 10% Modified Carson/Millonig

The Carson Millonig modified buffering formulation preserves tissue specimens for both **light and electron microscopy**, and can be used in place of traditional 10% NBF.

| | | |
|---------------------------|--------|--|
| 20 mL container, 96/case | CM1507 | |
| 40 mL container, 96/case | CM1115 | |
| 60 mL container, 96/case | CM1230 | |
| 120 mL container, 96/case | CM1460 | |

Zinc Formalin, Buffered

Ready-to-use Zinc Formalin solution. Especially recommended for use in **immunohistochemistry**, as zinc formalin preserves more immunoreactivity than standard NBF.

| | | |
|----------------------------|---------|--|
| 20 mL containers, 96/case | BFZ0507 | |
| 40 mL containers, 96/case | BFZ0115 | |
| 60 mL containers, 96/case | BFZ0230 | |
| 120 mL containers, 96/case | BFZ0460 | |

Cold Climate Transport Solutions

This special alcoholic formalin blend is an ideal year-round fixative but is especially suitable for laboratories in colder climates. The addition of alcohol makes the solution more resistant to freezing temperatures.

Neutral Buffered Formalin with 10% Alcohol

| | | |
|--------------------------|-------------|--|
| 7 mL container, 100/case | ANB0735/100 | |
|--------------------------|-------------|--|

Neutral Buffered Formalin with 5% Alcohol

Special alcoholic formalin blend is an ideal year-round fixative but is especially suitable for laboratories in colder climates. The addition of 5% alcohol makes the solution more resistant to freezing temperatures.

| | | |
|--------------------------|---------|--|
| 20 mL container, 96/case | ANB0507 | |
| 40 mL container, 96/case | ANB0115 | |
| 60 mL container, 96/case | ANB0230 | |

Specialty Fixatives

NEW! GI Fix

Designed for use on gastrointestinal and liver tissues. Produces high quality results on tissues containing large amounts of mucin, inflammatory cells, and cytoplasmic RNA while eliminating the use of hazardous chemicals.

| | | |
|---------------------------|-----------|--|
| 20 mL containers, 96/case | GIFIX0507 | |
| 40 mL containers, 96/case | GIFIX0115 | |
| 60 mL containers, 96/case | GIFIX0230 | |

Safe alternative to B5!

B-Plus™ Fix

B-Plus Fix is a proprietary fixative that is excellent for bone marrow and lymph node biopsies, and is a safe and excellent alternative to mercury-based fixatives. New sizes available.

| | | |
|----------------------------|----------|--|
| 20 mL containers, 96/case | BFIX0507 | |
| 40 mL containers, 96/case | BFIX0115 | |
| 60 mL containers, 96/case | BFIX0230 | |
| 90 mL containers, 96/case | BFIX0345 | |
| 120 mL containers, 96/case | BFIX0460 | |

Prostate Biopsy Fixative (w/Eosin)

Specially formulated for prostate biopsies. Contains formalin, alcohol, and has a slight Eosin tint to ensure easy identification of biopsies after processing and embedding.

| | | |
|----------------------------|------------|--|
| 20 mL containers, 500/case | PF0507B500 | |
|----------------------------|------------|--|

Urofix

An excellent fixative for prostate biopsies. Preserves nuclear detail extremely well, and penetrates tissue quicker, thereby shortening fixation times.

| | | |
|----------------------------|------------|--|
| 20 mL containers, 96/case | UF0507 | |
| 20 mL containers, 500/case | UF0507B500 | |
| 60 mL containers, 96/case | UF0230 | |
| 120 mL containers, 96/case | UF0460 | |
| 240 mL containers, 72/case | UF08120 | |

Bulk Fixatives

Formalin Fixatives

Formalin, 10% Neutral Buffered

pH 7.0. Ready-to-use buffered formalin.

| | |
|-----------------------|-----------|
| 1 gallon | 28600-1 |
| 2.5 gallon cubitainer | 28600-2.5 |
| 5 gallon cubitainer | 28600-5 |

Carson/Millonig Formalin, 10% Modified

The Carson Millonig modified buffering formulation preserves tissue specimens for both **light and electron microscopy**, and can be used in place of traditional 10% NBF.

| | |
|---------------------|---------|
| 5 gallon cubitainer | 28610-5 |
|---------------------|---------|

NEW! NBF Clear™

NBF Clear™ is a 10% Neutral Buffered Formalin solution with a specialized buffering system. Replacing standard 10% Neutral Buffered Formalin with NBF Clear™ ensures that your equipment stays clear of clogging precipitants.

| | |
|----------|------|
| 1 gallon | 0169 |
|----------|------|

Formaldehyde, 37%

Contains methanol as a stabilizer.

| | |
|---------------------|---------------|
| 1 gallon | 28530-1 |
| 5 gallon cubitainer | 28530-5 |
| 55 gallon drum | 28530-55-DRUM |

Zinc Formalin, Buffered

Ready-to-use Zinc Formalin solution. Especially recommended for use in immunohistochemistry, as zinc formalin preserves more immunoreactivity than standard NBF.

| | |
|---------------------|-------|
| 1 gallon | BFZ-1 |
| 5 gallon cubitainer | BFZ-5 |

Specialty Fixatives

Don't see a speciality fixative you're looking for? Contact us

Lymph

Gastrointestinal

Prostate

Fatty Tissue

StatFix™

Buffered alcoholic formalin fixative. Particularly well suited for fatty tissues, rapid diagnostic applications and routine frozen sections.

| | |
|----------|------|
| 1 gallon | SF-1 |
|----------|------|

Dissect Aid™

Excellent for the detection of lymph nodes; dramatically improves lymph node recovery/harvesting, and also an excellent fixative for fatty tissues. This formulation has helped in diagnosis for the past 30 years.

| | |
|-----------------|----------|
| 1 gallon | 9001-1 |
| 2.5 gallon cube | 9001-2.5 |
| 5 gallon cube | 9001-5 |

NEW! RapidFix™

Buffered formalin fixative for use at the grossing station. Fixes approximately 50% faster than 10% NBF, yet safe enough for use on all tissue specimens. Compatible with all other primary fixatives with no interference with any special stain or IHC procedures.

| | |
|---------------|------|
| 1 gallon | 0172 |
| 5 gallon cube | 0175 |

B-Plus™ Fix

B-Plus Fix is a proprietary fixative that is excellent for bone marrow and lymph node biopsies, and is a safe and excellent alternative to mercury-based fixatives. New prefill sizes now available.

| | |
|----------|---------|
| 1 liter | BFIX-32 |
| 1 gallon | BFIX-1 |

Formalin Alternatives

ExCell Plus™

ExCell Plus™ is a tissue fixative is a low-hazard alternative to 10% formalin. But now, it is the only tissue fixative that actually smells pleasant! ExCell Plus™ contains No Heavy Metals, and penetrates most tissue specimens as fast as 10% Formalin.

| | |
|---------------------|----------|
| 1 liter | FXEXPLT |
| 1 gallon | FXEXPGAL |
| 5 gallon cubitainer | FXEXP5CB |

GTF™ Formalin Substitute

A glyoxyl based, formalin-free fixative that is excellent for conventional histology, special stains and immunohistochemistry. Our formaldehyde-free solution provides the morphological detail of a standard aldehyde fixative while preserving high levels of immunoreactivity.

| | |
|----------|------|
| 1 gallon | FS-1 |
|----------|------|

Precipitant-free

Keep your processors in good working order and free from clogs.

PureFix™

PureFix™, 10% Non-Buffered Formalin is preferred by some labs. Will not produce salt precipitates that may obstruct tissue processor lines.

| | |
|---------------------|--------|
| 5 gallon cubitainer | 3180-5 |
|---------------------|--------|

Transport Kits & Slide Mailers

CUSTOMIZE ME!

StatLab manufactures many commonly-used biopsy kits and offers a variety of slide and block mailing options.

StatLab's **new dedicated kitting department** can handle any of your custom kitting needs. Connect with your representative for customized collection kit options.

Urine Collection & Transport Kits

Urine Cytology Collection and Transport Kit

Convenient method for collection, preservation, and transport of urine cytology specimens. For urine cytological testing, kit contains prefilled fixative jar, sterile 120 mL urine collection jar, and a biohazard transport bag.

Kit sold individually UCK-TP

Prostate Biopsy Kits

In addition to standard biopsy kits, StatLab has expanded kit options to include a variety of components to meet your needs.

StatLab prostate biopsy kits include:

- ✓ Pre-labeled positions in the box that correlate to the sample area
- ✓ Biopsy location stickers
- ✓ StatClick prefill containers to eliminate leaks

Biopsy Location Stickers, 12-vial Kit

Prostate Biopsy Kit

NBF PREFILLS

Kit is pre-labeled with location diagram. Kits contain pre-filled NBF arranged in pre-labeled positions that correlate with the area of the prostate from which sample is taken. Biopsy location stickers included.

| | |
|------------------------------|---------|
| 20 mL containers, 6 per kit | PBKNB6 |
| 20 mL containers, 8 per kit | PBK0507 |
| 20 mL containers, 12 per kit | PBKNB12 |
| 20 mL containers, 16 per kit | PBKNB16 |

Prostate Biopsy Kit

PROSTATE FIXATIVE PREFILLS

Kit is pre-labeled with location diagram. Kits contain vials pre-filled with Prostate Fixative, arranged in pre-labeled positions that correlate with the area of the prostate from which sample is taken. Biopsy location stickers included.

| | |
|------------------------------|---------|
| 20 mL containers, 12 per kit | PBKPF12 |
|------------------------------|---------|

Prostate Biopsy Kit with Cassettes

NBF PREFILLS CASSETTES

Kit is pre-labeled with location diagram. Kit contains two 120 mL pre-filled NBF containers with biopsy location stickers, a specimen bag, and 12 pre-labeled cassettes.

| | |
|--|-----------------|
| 2, 120mL containers, bag and cassettes | PBKNB2/120/CASS |
|--|-----------------|

Slide & Block Transport

Chipboard Folder 20-Slide

Traditional folder. Design permits easy removal of slides.

| | |
|---------|----------|
| 12/each | SF100/12 |
|---------|----------|

Plastic 5-Slide Cytomailer

Rectangular polypropylene design. Hinged flip top.

| | |
|---------|-----------|
| 100/box | SM500-100 |
|---------|-----------|

Plastic 6-Block Mailer

Transport container made especially for paraffin blocks. Sturdy and transparent for easy viewing of contents. Can be used for handling and shipping up to 6 blocks as needed. The attached cover is easy to close securely. Suitable for most tissue and biopsy cassettes.

| | |
|---------|--------|
| 50/case | M477-6 |
|---------|--------|

StatMark® Pen

Designed exclusively for lab techs, this original formulation does not dry out, and withstands exposure to common processing chemicals; excellent for both slides and embedding cassettes.

| | |
|--------|--------|
| 12/box | SMP-BK |
|--------|--------|

Specimen Bags

Make sure your transport bags work for you. High-quality bags stand up to the wear and tear of both standard or overnight shipping. Contact us for logo customization.

Specimen Transport Bags with Tear-Zone

Biohazard symbol displayed on orange or red background. Pocket allows for segregation of paperwork.

| | |
|------------------------------------|---------|
| 6" x 9", zip lock, 1,000/case | BGT0609 |
| 8" x 10", zip lock, 1,000/case | BGT0810 |
| 12" x 15", zip lock, 500/case | BGT1215 |
| 15" x 17", adhesive seal, 500/case | BGT1517 |

Specimen Transport Bags with Absorbent Sheet

Specimen transport bag with 3 x 5 absorbent sheet inserted. In conformance with IATA and CFR shipping and packaging requirements for diagnostic specimens, sheet absorbs the contents of the specimen container should a leak occur.

| | |
|--------------------------------|-----------------|
| 6" x 9", zip lock, 1,000/case | BGT0609/WP |
| 8" x 10", zip lock, 1,000/case | BGT0810/WP/1000 |

The Tear Zone

Preferred in high volume labs, specimen compartment is scored to allow for easy access with just 1 rip.

Destroyable Specimen Transport Bags with Tear-Zone

Destroyable bag with biohazard icon above tear-zone for minimal biohazard waste creation.

| | |
|-------------------------------|-----------|
| 6" x 9", zip lock, 1,000/case | BGT0609/D |
|-------------------------------|-----------|

Autopsy, Dissection & Grossing

Let StatLab grossing products assist you in accurate and efficient tissue dissection and autopsies.

Neutralizing Products

Safely neutralize and dispose of formalin while avoiding the cost of aldehyde waste recycling. StatLab's eco-friendly neutralizing products are the sensible choice for your lab and the environment.

Safe on every level.

Two proprietary formulations designed to treat and eliminate aldehyde contamination in our municipal water systems. Both options are effective at treating aldehydes prior to sanitary sewer disposal.

NeutraGreen™ (Liquid Neutralizer)

Transforms waste formalin into an odorless, 100% non-hazardous material. Comes in liquid form with no powders to mix or dissolve. Waste reaction time of 2-3 hours enables same day disposal. Third-party environmental data confirms NeutraGreen™ will neutralize waste formalin to a material that is non-toxic as well as non-hazardous.

| | |
|------------------|---------|
| 1 gallon, 4/case | 1525-1G |
| 2.5 gallon cube | 1525-25 |
| 5 gallon cube | 1525-18 |

NeutraGreen™ Aldehyde Test Strips

Used to help determine if waste formalin has been safely and effectively neutralized for drain disposal.

| | |
|---------------|--------|
| 50 per bottle | NTS-50 |
|---------------|--------|

NeutraSafe™ (Powdered Neutralizer)

Safely and quickly neutralizes aldehyde solutions for safe drain disposal. Effectively neutralizes in 20-30 minutes. Simply add one bottle of NeutraSafe™ to each gallon of waste formalin solution.

| | |
|-----------------|----------|
| 500 mL, 12/case | NS550-12 |
|-----------------|----------|

NeutraSafe™ Aldehyde Test Kit

Kit contains collection vessel, reagent powder packet, and color indicator solution.

| | |
|------------------|--------|
| 25 tests per kit | FTK/25 |
|------------------|--------|

FormaGuard™ Pads

Dry Mats™ Formalin Neutralizing Pads

Dry Mats™ are a unique solution for aggressive spill response and formalin vapor control. Highly absorbent and dry 12" x 13" sheets contain a proprietary formaldehyde-specific neutralizer. Excellent for grossing stations, countertops, storage cabinets, and any area where formaldehyde spills might occur.

| | |
|-----------------------------------|---------|
| 4 packs of 50 mats/case, 200 mats | 1728-54 |

Bestseller!

FormaGuard™ Formalin Neutralizing Pads

FormaGuard™ Pads provide an effective way for lab personnel to guard against formaldehyde vapors and exposure by allowing formalin penetration into a highly absorbent core. The FormaGuard™ Pad is light blue, rigid, polycoated, and roughly 1/8" in thickness.

| | |
|---------------------------|----------|
| Small 8" x 11", 25/pack | FGP0811 |
| Medium 11" x 15", 25/pack | FGP1115 |
| Large 15" x 20", 25/pack | FGP1520 |
| Roll, each 13 1/2" X 30' | FGP13530 |

Polyform-F™

Spill control for safe and rapid handling of formaldehyde vapors. Formaldehyde is neutralized and irreversibly polymerized leaving a non-hazardous biodegradable polymer.

| | |
|----------|------|
| 1 gallon | PF04 |

| Transform Pellets 5lbs, Each | CWTFSA5LB |
|------------------------------|-----------|

Tissue Marking Dyes

Get the outstanding performance you expect by using StatLab marking dyes to isolate specific areas of tissue samples and identify surgical margins. Sold individually or in a set.

Tissue Marking Dye Set

Set includes one tissue marking dye rack and a set of **2 oz dyes** in each of 7 colors.

| | |
|---------------|-------|
| Set of 1 | SL669 |
| Dye rack only | SL667 |

Best Selling

Original flip top design and proprietary formulation designed to eliminate evaporation and sludgy dyes, with fewer drips and spills.

Tissue Marking Dyes

Permanent tissue marking dyes. Seven colors formulated to define margins without bleeding or fading. Durable, bright dyes hold permanently through processing and staining procedures. Unique lids may either be completely removed or conveniently flipped open to prevent drying.

Blade Accessories

Aunex Blade Remover

The Aunex one-handed blade removal system allows you to simply push and pull to remove scalpel blades without forceps or fingers. It is the first blade remover to remove larger Pathology & Autopsy blades, such as the #60, and #70 blades, in addition to standard blades sizes of #11-#26. Holds up to 200 blades.

| | |
|--------|---------|
| 1 each | 48CS-EA |
|--------|---------|

Blade Remover

Convenient method for removal of #22 scalpel blades. Insert blade and handle into the slot, press and pull. Blade falls safely into a compartment that stores up to 100 blades. Sold individually.

| | |
|--------|---------|
| 1 each | SL92500 |
|--------|---------|

Sharps Containers

For the safe containment and disposal of used microtome blades, scalpel blades, slides, coverglass, or other medical waste. Made of high density polyethylene plastic. Attached lid prevents loss and forms a leak-proof seal when securely attached. OSHA Compliant.

Bestsellers!

Developed in 1957, these are **the first commercially prepared bone decalcifiers** made available to pathology laboratories. Many knock offs have been made since then, but the originals remain the industry standard.

Decal™ Decalcifier

Since 1957 Original Decal® has been the industry standard. A gentle decalcifier formulated from semiconductor grade hydrochloric acid, EDTA, and highly purified reagent grade water. Can be used to safely decalcify all types of tissue samples from needle biopsies to cortical bone. It's mild enough that most samples can be left in overnight; over-decalcification is not a worry.

| | |
|---------------|---------|
| 32 oz | 1211-32 |
| 1 gallon | 1211-1 |
| 5 gallon cube | 1211-5 |

Decal Stat™ Decalcifier

Formulated to work faster than Original Decal®. Can be used on all types of calcified tissue but is especially popular for use on bone marrow samples. Decalcifies the average bone marrow biopsy in less than one hour. Sections will cut beautifully and all types of routine and special stains work flawlessly. Cellular and nuclear details remain crisp and clear.

| | |
|---------------|---------|
| 32 oz | 1212-32 |
| 1 gallon | 1212-1 |
| 5 gallon cube | 1212-5 |

Processing Nails?

Try this exclusive formulation designed for pre-processing nail preparation. Fast, efficient, and ready to use, with two concentrations available.

Nail Prep™ Solution

Use pre-processing. The solution softens brittle nail clippings. Nail Prep™ makes specimens easier to cut and process, and helps to keep tissue from washing off the slide.

| | |
|--------|--------|
| 500 mL | NP-500 |
|--------|--------|

Nail Prep™ Elite (rapid)

Use pre-processing. A higher concentration solution works quickly to soften brittle nail clippings. Results can be seen in as little as 15 minutes.

| | |
|---------------|--------|
| 5 gallon cube | PH30-5 |
|---------------|--------|

IHC Formical-2000™ Decalcifier

A fast yet gentle bone decalcifier that has been formulated from semiconductor grade formic acid, highly purified reagent grade water and EDTA. Formical-2000™ works well not only as a general purpose decalcifier for all routine histological specimens, it works especially well to decalcify tissue for immunohistochemistry. Will safely decalcify bone without destroying antigen sites.

| | |
|---------------|---------|
| 32 oz | 1314-32 |
| 1 gallon | 1314-1 |
| 5 gallon cube | 1314-5 |

IHC Immunocal™ Decalcifier

Very mild formic acid decalcifier formulated from semiconductor grade formic acid and highly purified reagent grade water. Ideal for decalcifying bone for immunohistochemistry. Will not destroy antigen sites during decalcification and can safely be used to demonstrate antigens in decalcified bone.

| | |
|----------|---------|
| 32 oz | 1414-32 |
| 1 gallon | 1414-1 |

Nitrical™ Decalcifier

Safe and gentle standard AFIP formulation. Made from semiconductor grade acid and highly purified reagent grade water. Excellent decalcifier for busy laboratories where time is a critical element. Very mild solution that works rapidly with beautiful results. Can be used for all types of specimens from bone marrow to cortical bone.

| | |
|----------|---------|
| 32 oz | 1213-32 |
| 1 gallon | 1213-1 |

IHC Formical-4™ Decalcifier

Fixative decalcifier can save time. Fresh tissue can be placed directly into Formical-4™ to fix and decalcify simultaneously. Formulated for use on large dense samples that normally take several days to decalcify. In most cases, poor decalcification is due to poor fixation as large, dense bone usually does not fix properly. As Formical-4™ begins to decalcify large specimens, it allows better penetration of formaldehyde. Therefore, cortical bone, femoral heads, and teeth will not only decalcify better, they will fix better. Formical-4 has also proven to be a smart choice for IHC and ISH.

| | |
|---------------|---------|
| 32 oz | 1214-32 |
| 1 gallon | 1214-1 |
| 5 gallon cube | 1214-5 |

IHC RapidCal Immuno

Formulated to decalcify bone rapidly, yet perform gently enough to be used as a routine decalcifying solution for bone marrow biopsies. Designed to preserve maximum immunogenicity while accomplishing rapid decalcification.

| | |
|----------|------|
| 1 pint | 6086 |
| 1 gallon | 6089 |

Versenate Decal Solution

A non-aggressive chelating bone decalcifier which allows extensive use of special stains and immunohistochemical techniques.

Mesh Cassettes

Keep small biopsy samples secure. StatLab offers three specialty cassettes to contain even the smallest biopsy while allowing the necessary flow of processing liquids.

New to StatLab!

New fine mesh cassettes for automatic cassette printers are ideal for small biopsies and fragile specimens, eliminating the need for messy sponges, bags, and paper. Rounded BioMesh edges ensure no tissue fragments are lost in the corners.

45°
labeling
surface

NEW! BioMesh® Cassettes
(hinged lid, front tab)

Patented design uses a fine tinted nylon screen that contains small biopsies while allowing ample flow of processing fluids. 0.30 mm pore size. 45° labeling surface.

Microbiopsy Cassettes for automatic cassette printers (attached lid, front tab)

LIDS ATTACHED

Cassettes come with an attached lid that has an easy to use 'break-off' hinge. The locking mechanism on the cassettes ensure maximum tissue security during processing. The microbiopsy cassette incorporates square apertures of 0.38mm, which ensure the safe processing of small biopsies, while also facilitating proper levels of reagent exchange.

PiCassettes

Intended for use with the PiSmart Cassette Printer, the proprietary design of Pi Cassettes ensures print integrity is retained through the entire workflow.

Explore the StatLab PiSmart Cassette Printer
See page 160

Pi Cassettes are engineered specifically for use on the PiSmart printer, and utilize a patented feature to protect the printed surface during dewaxing, while still enabling the surface to be cleared of wax. The cassettes are provided in threaded format, eliminating loading time for more efficiency. The plastic support thread enables users to quickly load all or part of the stack of cassettes into the hopper.

Patented Features

Pi Cassettes contain 4 patented pips on each corner of the cassette, protecting the thermal printing from high heat during dewaxing.

Supa Mega™ Cassettes

StatLab's Supa Mega range of cassettes is ideal for embedding and processing larger tissue samples. Designed with a large open pore area to allow for better reagent flow, greater adhesion of paraffin to the cassette, and improving turnaround times.

NEW! Supa Mega™ Cassettes

The Supa Mega Cassette is useful for prostate, brain, breast and eye tissue. Complete with a robust and secure closing mechanism that retains its strength after multiple openings, the cassette is designed for easy use by both left and right-handed users.

NEW! Supa Mega™ Mothership Cassettes

Supa Mega Mothership cassettes provide an innovative solution for the processing, embedding and tracking of large tissue specimens. Designed in accordance with recommendations of HER2 testing in the UK⁽¹⁾ and ASCO/CAP in the USA^(2,3), by reducing specimen thickness and shortening processing time, while ensuring high-quality tissue processing.

NEW! Supa Mega™ Slim Cassettes

The Supa Mega Slim cassettes are widely adopted in clinical, research and toxicology laboratories. The internal chamber's thinner depth reduces specimen thickness and shortens processing time so casting can be done in only 20 minutes at -8°C.

Supa Mega™ Stainless Steel Base Molds

Supa Mega stainless steel base molds have extra deep side walls which allow paraffin to be decanted into the cassette without the risk of the usual 'leakage' of paraffin.

NEW! Supa Mega™ Base Molds, 5/box

| | |
|---|--------------|
| Stainless Steel Supa Mega Base Mold, 1.4in x 1.4in x 0.4in | GBC-3614-05A |
| Stainless Steel Supa Mega Base Mold, 2.4in x 1.8in x 0.6in | GBC-6014-05A |
| Stainless Steel Slim Base Mold, 2.4in x 1.8in x 0.3in | GBC-6014-05B |
| Stainless Steel Mothership Base Mold, 2.4in x 1.8in x 0.3in | GBC-6014-05A |

Key Benefits

- ✔ Reusable
- ✔ Stops paraffin leakage
- ✔ Requires less paraffin
- ✔ Stainless steel for lifetime use

Biopsy Bags, Wraps & Pads

Get added security for your smallest tissue samples. StatLab offers a selection of products that protect small tissue while allowing for the ample flow of processing fluids.

Foam Biopsy Sponges

Blue, black and white foam pads that secure small specimens during processing. 1" x 1 1/4".

| | |
|-------------------|---------|
| Blue, 1,000/case | SL30B/T |
| White, 1,000/case | SL30W |
| Black, 1,000/case | SL30BK |

Biopsy Wraps

2" x 3", solvent-resistant, thin biopsy paper. Protects biopsy and while allowing for optimal infiltration and fluid exchange. Available in white and pink.

| | |
|------------------|----------|
| White, 1,000/box | BS-2X3/W |
| Pink, 1,000/box | BS-2X3/P |

Bio-Mesh™ Biopsy Bags

Secures small biopsies during processing. Synthetic mesh, small pore design, ensures unrestricted flow of processing reagents around specimens. Resistant to solvents and acids. 1,000 bags per case.

| | |
|-----------------------|----------|
| Small, 30 mm x 45 mm | BBSM1000 |
| Medium, 45 mm x 75 mm | BBMD1000 |

TissueWrap

TissueWrap Biopsy Paper is specifically designed for processing biopsy specimens. The tissue paper is cut to a convenient 60x60mm, ready-to-use size. This non-absorbent paper allows fluids to flow through freely while retaining small tissue fragments.

| | |
|----------|--------------|
| 500/pack | EBB-0102-10A |

Marking Accessories

StatMark® Pen

Designed exclusively for lab techs, this original formulation does not dry out, and withstands exposure to common processing chemicals; excellent for both slides and embedding cassettes.

| | |
|--------|--------|
| 12/box | SMP-BK |
|--------|--------|

Cyt-o-Dot Pens

Cyt-o-dot cytology pens are designed for ink application on glass slides and coverslips after staining. Durable, acrylic fiber nib is beveled to a precise, fine point. The ink line or 'dot' applied is the ideal size for microscopic visualization. Fine tip cytology markers are permanent, waterproof, and write on almost any surface including glass, plastic, ceramic and metal. 4/pack

| Red | 9004 |
| Black | 9005 |

TissueGuard™ Processing Gel

Stabilize fragile specimens during processing by preparing with TissueGuard processing gel.

Tissue Guard encapsulates and retains specimens during histological processing while allowing chemical reagents to penetrate the specimen. Appropriate for cytology and histology applications, TissueGuard is an alternate to other agarose stabilizers.

Cytology

Protect fine needle aspirates, urine specimens, non-gyn specimens, and any other specimens utilizing cell block preparation. Product can be applied in centrifuge tube, in conjunction with BioMesh tissue cassettes, or using tissue paper. After application, specimen is ready for processing within minutes, or sooner if aided with a cooling block.

Histology

Protect samples including needle biopsies, nerves, small arteries, aggregates, lymph nodes and the smallest of tissue fragments. Product can be applied to samples in conjunction with BioMesh cassettes, or using filter paper.

- 1 Warm the Gel**
 TissueGuard will be solid when kept at recommended storage temperatures. Warm to 60°C using microwave, boiling water, or dry bath incubator.
- 2 Add Gel to Specimen**
 Using a pipette, apply to specimen, completely covering specimen at the bottom of a centrifuge tube, BioMesh tissue cassette, or on non-porous filter paper.
- 3 Cool Before Processing**
 TissueGuard must cool to a solid state before processing specimens. Use cassettes on a cooling tray to reduce the 2-3 minute time at room temperature. Process as usual.

TissueGuard™ Processing Gel

CASSETTES & ACCESSORIES

The background of the slide is a microscopic image of a tissue section, likely from a glandular organ like the pancreas, showing various cellular structures and ducts. The image is overlaid with a semi-transparent green gradient that darkens towards the right side of the slide.

Tissue processing and embedding

StatLab's high-performance reagents will help you efficiently prepare and process any type of tissue with confidence.

Clearing Agents

Whether you use xylene or a xylene substitute, StatLab's high-quality clearing agents will help you prepare your tissue for infiltration.

TISSUE PROCESSING AND EMBEDDING

Xylene

Xylene, Laboratory Grade

Purified and filtered to deliver a high quality, consistent product. High solvency factor ensures quick and complete clearing. Free of impurities and water.

| | |
|-------------------|--------|
| 1 gallon (4/case) | 8400-1 |
|-------------------|--------|

Xylene Substitutes

Citra-Clear™ Xylene Substitute

100% d-Limonene for processing and staining. Mild citrus odor. Exceptionally high purity. Flash point 122°F.

| | |
|-------------------|--------|
| 1 gallon (4/case) | 6400-1 |
|-------------------|--------|

XS-3™ Xylene Substitute

100% aliphatic hydrocarbon for processing and staining. Higher permissible exposure limit than xylene. Virtually no odor. Flash point 104°F. Exceptionally high purity.

| | |
|-------------------|--------|
| 1 gallon (4/case) | 7400-1 |
|-------------------|--------|

Paraffin

54°-56°
MELTING POINT

ParaPro™ SEM

ParaPro™ Standard Embedding Media. A softer paraffin. For infiltration and embedding. This ParaPro™ formulation consists of a low polymer count, which improves infiltration and embedding and leads to more efficient deparaffinization. Minimizes wrinkles. Melting point 54-56°C.

0.8 kg bag, 10/case PPSEM

50°-54°
MELTING POINT

ParaPro™ LMP

ParaPro™ Low Melting Point. A medium/hard paraffin. For infiltration and embedding. Consists of a specialized blend of low-molecular-weight paraffin and polymers to reduce melting point. This lower melting point protects tissues from excessive temperature during processing. Melting point 50-54°C.

1 kg bag, 8/case PPLMP

55°-57°
MELTING POINT

ParaPro™ XLT

A superior mixture of waxes and copolymer alloys, ParaPro™ XLT is our signature paraffin in the ParaPro™ line. A medium/hard paraffin. For infiltration and embedding. ParaPro™ XLT produces ultra-thin compression-free ribbons and can be used to cut 2-micron sections without icing. Provides excellent support for all types of tissue samples while maintaining exceptional clarity. Melting Point 55°-57°C.

0.8 kg bag, 10/case PPXLT

NEW!

50°-54°
MELTING POINT

ParaPro™ 360

Appropriate for infiltration and embedding, ideal for standard ribbons down to the thinnest 2-micron sections—all at a low melting point. PP360 is formulated with a proprietary blend of low-molecular-weight paraffin and polymers. Your new all-around favorite.

0.8 kg bag, 10/case PP360

54°-57°
MELTING POINT

ParaPro™ Blue

Universal infiltration and embedding paraffin composed of light blue pellets. A medium paraffin. The blue color makes it easier to visualize small biopsies after processing. Highly refined with the addition of synthetic polymers, enabling rapid impregnation. Optimized for dermatology and urology specimens.

1 kg bag, 8/case PPBLU

Find out which paraffin product is better for you! Contact us for a sample paraffin block

To Protect, Clean and Repel

Our exclusive formulation helps you achieve a cleaner, safer workplace by helping to easily remove sticky and slippery paraffin waste. If you're working with paraffin, you need PolyShield®!

PolyShield®

PolyShield® is a liquid paraffin repellent used as a protective coating on laboratory surfaces that are exposed to paraffin residue. PolyShield® can also be used to clean paraffin that has adhered to lab countertops and equipment.

120 mL spray bottles, 6/case

PS/6

Para-Trim Paraffin Scaper

Plastic paraffin scaper, perfect for cleaning up lab countertops and equipment.

Sold individually, 1 each

PT-SLMP

Embedding Accessories

Work smarter and more efficiently with StatLab's line of helpful embedding tools.

Customer-inspired!

Designed in partnership with a histotech, the wide base of these proprietary tampers means reduced manual effort and risk for repetitive motion injury. Ergonomic, heavy-duty, tech-friendly, easy and efficient.

Tissue Tamp™ Embedding Tamper Set

Tissue Tamp™ Tamper Set was specially developed for histology lab professionals. The set comes with two ergonomic embedding tampers and an easy-to-use stand that will keep the tampers within reach. Is easily adaptable to any brand of embedding station hot plate.

| | |
|-------|-------|
| 1 set | TTS-2 |
|-------|-------|

MasterPress Tissue Tamper

Flattening tissue within the base mold couldn't be easier. This tool is made with a comfortable, longer handle that's not only xylene resistant but stays cooler when the base is hot. Round, 1/2 inch.

| | |
|---------------------|------------|
| Round Blue, 2/pack | TCZ1100BLP |

| Stainless Steel Mothership Base Mold, 2.4in x 1.8in x 0.3in | GBC-6014-05A |

Block-Out®

Base mold release compound. Excellent for use as a base mold coating to allow for easy separation of paraffin from the base mold. Helps to prevent paraffin build-up on metal base molds.

150 mL bottle, 1 each BMR-4

Metal Base Molds

Fits most standard tissue embedding cassettes. Stainless steel construction provides superior thermal conductivity. The molds have a highly polished surface for easy paraffin block removal and cleaning. The well corners are rounded for effortless tissue block removal and optimal paraffin ribboning. 12 per case.

Supa Mega™ Base Mold

Microtomy

Consistently produce great slides from hard, soft or frozen specimens. Created with the help of working microtomists, StatLab's diverse line of products for both microtomes and cryostats will help you get great results.

Microtome Blades

Cost-efficient blades created for stability and durability.

Variety

A variety of blades provide effective options based on your preferences for coatings, strength, sharpness and more. StatCut™ and TruCut™ lines are manufactured in Japan while Opticut™, PolyCut™, and Sapphire are made in the USA.

Durability

All StatLab blades are developed to be ultra-durable and long-lasting, for fewer changes in your lab, leading to increased efficiency in cost and time.

StatCut™

Our signature blade, known for durability and sharpness.

TruCut™

A Japanese blade, coated using a proprietary ionization process.

OptiCut™

A customer favorite, made in the USA, known for its ultimate sharpness.

StatCut™ Microtome Blades

Suitable for both soft and hard tissue, StatCut™ Blades are well balanced in durability and sharpness. They are coated for non-stick sections and effortless ribbing.

| | |
|--|---------|

Did you know?

39.3%

Customers on average use 39.3% fewer blades per year by switching to StatCut.¹

¹StatLab in house data from 2 year customer study

Cutting Edge

The end result of centuries of Japanese craftsmanship, skill, and knowledge, our blades are the highest quality option when it comes to sectioning. Extreme sharpness and durability are the two primary features of these best-selling blades.

TruCut™ Microtome Blades

TruCut™ Disposable microtome blades demonstrate increased sharpness, and greater durability compared to many conventional microtome blades. Made in Japan with a proprietary surface ionization process, the blade edge is slowly refined, sharpened and optimized in order to maximize hardness, sharpness and durability.

TruCut™ Low Profile Microtome, 50 blades/pack CUT7500

TruCut™ High Profile Microtome, 50 blades/pack CUT7550

OptiCut™ Microtome Blades

Looking for a quality blade made in the US? OptiCut™ Blades are precision manufactured to the highest standards for sharpness, consistency, and durability. A proprietary honing and polishing process ensures consistent sharpness and exceptional durability. Made in the USA.

OptiCut™ LP Low Profile, 50 blades/pack CUT7223

OptiCut™ LPX Low profile, Ultra Thin, 50 blades/pack CUT7380

OptiCut™ HP High Profile, 50 blades/pack CUT3210

OptiCut™ HPC High Profile Ceramic Coated, 50 blades/pack CUT7203

Frozen Sectioning

Compare two choices of frozen section embedding media to determine the one that's best for your lab.

PolarStat™ Embedding Medium for Frozen Sections

An aqueous-based frozen section embedding medium designed to support tissue blocks in cryostat sectioning. Formulated to promote rapid freezing, enhanced sectioning and consistent results at a working temperature of -20°C.

| | |
|-------------|--------|
| 4 oz bottle | CRYO-4 |
|-------------|--------|

See Our True Colors

Our best selling PolarStat *Plus* family is growing! Now available in multiple colors for easy identification of multiple specimens during sectioning and staining.

PolarStat *Plus*™ Embedding Medium for Frozen Sections

Medium Viscosity Formulation especially well suited for Mohs cryostat sectioning. This formulation freezes at optimum cutting temperatures of -10°C and below. No residue is left on slides during the staining procedure, thereby eliminating undesirable background staining.

| | |

Tissue Grip™
Water Bath Adhesive
500 mL

WARNING:
CONTAINS: Ethylene Glycol (107-21-1), 5-Chloro-2-methyl-3[2H] - Isothiazolone, mixture with 2-mercaptoethanol (109-94-9). **HAZARD STATEMENT(S):** Causes skin irritation. May cause an allergic skin reaction. May cause damage to organs (kidney) through prolonged or repeated exposure. **PRECAUTION STATEMENT(S):** Do not breathe vapors, mist, or spray. Wash hands, forearms, and other exposed skin after handling. Wear protective gloves, protective clothing, and eye protection. **IF ON SKIN:** Wash with soap and water. If irritation persists, get medical advice/attention. If skin irritation or rash occurs, get medical advice/attention if you feel unwell. Specific treatment (see SDS section 4). Take off contaminated clothing before reuse, do not allow out of the workplace. **STORAGE:** Keep container closed when not in use. Store away from direct sunlight, extremely high or low temperatures and heat sources. **Compatible Materials:** Strong acids, strong bases, strong oxidizers. **DISPOSAL:** Dispose of this product in accordance with local, regional, national, territorial, provincial, and international regulations. For more information, call StatLab at 800-424-9300. **DIRECTIONS:** Fill water bath with water (DI or Tap) and add 5-10 mL per liter of water to the bath. Stir water gently to ensure Tissue Grip dissolves completely and is mixed well. Use for fixation, drying and staining. Special stains and Immunohistochemistry may be performed with Tissue Grip™. Avoid the use of adhesive, coated or charged slides. For frozen sections, dip slides into a 1:10 solution with water, allowed to dry, and stored in a slide box after each use.

MICROTOMY

Microscope Slides & Coverslips

StatLab's diverse line of glass slides is sourced from all over the world. Both hard-working quality budget options as well as premium glass are available in a broad portfolio to meet your needs. All glass is pre-cleaned and free from film and distortion.

StatLab coverglass, made from pure white borosilicate glass, is especially well suited for use in automatic coverslipppers.

Millennia Command™ Adhesion Slides

Simplify workflow and improve performance with **Millennia Command**: the slide that checks all the boxes.

Strong adhesion meets the rigorous demands of harsh IHC processing, while low background staining makes Millennia Command an excellent choice for special stains and H&E; a true all-purpose slide. Compatible with all thermal transfer slide printers. Hydrophilic. 75mm X 25mm. 100/box, 10 boxes/case, sold by the ase.

"After testing side by side with slides currently in use, we reported consistent stain quality and uniformity, and improved adhesion performance. These slides are top of the line."

KAREN M., SCT (ASCP), CYTOLOGY SU PERSVISOR

Why switch to Millennia Command?

High adhesion produces excellent IHC results

Low background staining on all applications

Validated on Leica and Ventana platforms

Compatible with all thermal transfer printers

- StatLab PiSmart with PathSmart Tracking
- StatLab ESPO
- SlideMate and SlideMateAS
- Primera
- Leica HistoCore PERMA
- TissueTek SmartWrite

Side by side studies reveal equivalency compared to popular brand in:

-  Stain Quality
-  Stain Uniformity
-  Tissue Integrity

Adhesion Slides

Choose from StatLab's wide-ranging assortment of high-quality adhesion slides to be sure you have what's best for your lab.

Thermal Transfer Compatible

Millennia™ 1000 Adhesion Slides

Hydrophobic surface with strong adhesion. May be used for special staining, routine histology and frozen sections. 75 mm x 25 mm x 1 mm. 100 per box. 1,000 per case.

MICROSCOPE SLIDES & COVERSLIPS

Coverslipping Tape & Mounting Mediums

Hologic Validated

Millennia™ Coverslipping Tape

Millennia™ Coverslipping Tape is an exclusive resin coated, tri-acetate film from StatLab that eliminates the need for glass coverslips. Millennia™ coverslipping film is manufactured using a proprietary micro-diffusion adhesive, which helps to facilitate optimal adhesive dispersion. The film exhibits excellent transparency and optical performance, without the long term formation of bubbles or edge lifting. Each roll is 70 meters in length, 5 rolls per case. Sold by the case.

Validated by Hologic, 2023.

5 rolls/case M7500

Aging Analysis Summary

Based on the current test results, we assume that the actual condition of the test system represents or simulates long-term storage under stable conditions of at least 18-20 years. In comparison to the market leading product, the Millennia cover-slipping film was stable and performed at levels equivalent to or better than the market-leading product.

Acrymount Plus™

A rapid drying mounting medium/liquid coverglass. Soluble in both xylene and toluene. Compatible with xylene and d-Limonene clearing agents. Slides mounted with Acrymount™ may be screened in as little as 10 minutes.

| | |
|-----------------------------|-------------|
| 16oz | SL80PLUS-16 |
| 4 oz squeeze bottle, 4/pack | SL80PLUS-4 |

ClearMount™ Mounting Medium

ClearMount™ is a fast drying mounting medium. It is optically clear as glass and completely neutral. Formulated for automated or manual coverslipping.

| | |
|--------|---------|
| 480 mL | MMC0143 |
| 100 mL | MMC0126 |

CoverSafe™ Mounting Medium

CoverSafe™ is the first fast-drying, low-hazard, optically clear, permanent mounting medium available for use in Histology and Cytology. CoverSafe™ does not contain Xylene, Toluene, Dioxane, or Benzene.

Stains

Give your pathologists the quality and performance they expect. StatLab's stains are formulated with highest grade, certified raw materials. Quality control ensures longevity and lot-to-lot consistency through functionality testing, as well as analytical, qualitative and quantitative analysis of every lot.

H&E Stains for every preference.

Vintage Stains

Page 78

StatLab's Vintage Stain Line features more common hybrid stains. Durable, effective, and cost-effective, these stains get the job done.

Clearview Stains

Page 79

The ClearView Stain Line produces excellent staining of both small and large sections, and brilliant stains of nuclei and cytoplasm of cells.

Select Stains

Page 80

StatLab's Select H&E stains have unique chemical properties to provide the best possible cellular contrast.

See how these H&E stains perform in your lab

Our H&E Stain Evaluation Program offers a risk-free opportunity to improve your stains AND your workflow.

With four proprietary hematoxylin and four proprietary eosin formulations to mix and match, you can have complete control over the coloration of your slides while using the most state-of-the-art stain technology. We'll also take care of optimization for you, so there's no time wasted tweaking your current protocol to work with a new stain.

NEW! Troubleshoot common problems in H&E staining.

Visit [StatLab.com/statlab-continued-learning](https://www.statlab.com/statlab-continued-learning) to watch free pre-recorded webinars.

Reserve Stains

Page 81

StatLab's Reserve Stain Line is unique to the industry with the most distinct and cellular-specific stains available.

Classic Stains

Page 82

Before hybrid stains, there was Harris and Gill. If you prefer one of these classic options, StatLab's line of high-quality classic stains are exactly what the doctor ordered.

MasterTech H&E Stains

Page 83

Formulated to provide superior detail, MasterTech hematoxylin are produced using only BSC certified dyes.

COLLECT

Your Sales Representative will collect information on your current protocol, and gather stained and unstained slide samples.

2

PROCESS

Our team will select stains and tailor a protocol based on your unique preferences, staining the sample slides from your lab.

3

REVIEW

Your Representative will schedule time to review the samples with your pathologist to ensure complete satisfaction with the results.

Ask your representative about the Stain Evaluation Program.

Vintage Stain Line

The StatLab Vintage H&E Staining System provides laboratories with an excellent, cost-effective hybrid stain solution. These stains, effective for both cytology and histology, need no filtering and deliver unsurpassed nuclear chromatin delineation.

Bestseller!

Vintage Hematoxylin

Uniquely formulated hematoxylin stain to be used in place of Gill hematoxylin. No daily filtering required. Rapidly provides unsurpassed nuclear chromatin delineation with no affinity for background staining. May be used for both histology and cytology applications and is also recommended for frozen section staining.

| | |
|----------|---------|
| 500 mL | SL100 |
| 1 gallon | SL100-1 |

Vintage Eosin-Y

Proprietary, alcoholic and acidified formulation. Produces a brilliant cytoplasmic stain with three distinct color variations in a short amount of staining time. Yields a very familiar cytoplasmic staining result.

| | |
|----------|---------|
| 500 mL | SL101 |
| 1 gallon | SL101-1 |

For use with Vintage, ClearView, and Reserve Stains

3.5% High Def Acid Rinse

A glacial acid based formulation that provides unparalleled crisp nuclear chromatin detail and eliminates any undesired background staining. Premixed, safe, and ready-to-use.

| | |
|----------|-------|
| 1 gallon | SL103 |
|----------|-------|

For use with Vintage and ClearView Stains

Vintage Bluing Reagent (Scotts Tap Water Bluing Substitute)

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular contrast. Bluing Reagent is premixed and ready-to-use. Looking for a Scotts Tap Water Bluing substitute? This is it!

| | |
|----------|-------|
| 1 gallon | SL102 |
|----------|-------|

ClearView Stain Line

The StatLab ClearView Staining System quickly delivers consistent, high-quality results to support rapid diagnosis. Produces excellent staining of both small and large sections, and brilliant stains of nuclei and cytoplasm of cells. Produces no mucin staining.

ClearView Hematoxylin

Hybrid results. Produces excellent staining of small and large sections, particularly skin and GYN tissues. No background staining. No daily filtering needed.

500mL MA0101010

ClearView Eosin

ClearView Eosin counterstain is a superior counterstain for hematoxylin. It produces enhanced staining of nuclear and non-nuclear cellular components and improved differentiation by graded alcohols in the staining sequence.

500mL MA0101015

For use with Vintage, ClearView, and Reserve Stains

3.5% High Def Acid Rinse

A glacial acid based formulation that provides unparalleled crisp nuclear chromatin detail and eliminates any undesired background staining. Premixed, safe, and ready-to-use.

1 gallon SL103

For use with Vintage and ClearView Stains

Vintage Bluing Reagent (Scotts Tap Water Bluing Substitute)

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular contrast. Bluing Reagent is premixed and ready-to-use. Looking for a Scotts Tap Water Bluing substitute? This is it!

STAINS

Select Stain Line

StatLab's Select Hematoxylin distinctly stains nuclear chromatin and contains raw materials that are specific to certain proteins. Select Eosin has unique chemical properties, including pH, and effectively complements Select Hematoxylin to provide the best possible cellular contrast.

Select Hematoxylin

Proprietary progressive nuclear stain, considered a hybrid hematoxylin product. Select hematoxylin possesses the rapid staining qualities of Gill Hematoxylin along with the familiar brilliant nuclear chromatin delineation of a Harris. Does not require daily filtering. Has no affinity for background or mucin staining. May be used for routine H&E staining, IHC counterstaining, frozen section staining.

500 mL SL401

Select Eosin

Proprietary alcoholic and acidified formulation. Produces a brilliant cytoplasmic stain with three distinct color variations in a short amount of staining time.

500 mL SL402

1 gallon SL406

True "Blue"-ing

Visibly different for easy identification.
Select Bluing Reagent

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular hue staining. Select Bluing Rinse is premixed, ready-to-use and tinted blue for easy identification.

1 gallon SL403

Select Acid Rinse

Produces unparalleled crisp nuclear chromatin detail and eliminates undesirable background staining. Utilizes a buffer system to prevent pH fluctuation. Premixed and ready-to-use. Non-hazardous.

1 gallon SL404

Reserve Stain Line

StatLab's Reserve Stain Line is unique to the industry with the most distinct and cellular-specific stains available. Reserve Hematoxylin is uniquely engineered to only stain the nuclear chromatin. No mucin staining is seen. Eosin Multichrome is a unique formulation that features three dyes, providing brighter, crisper cytoplasmic hues in shorter times. Reserve stains can last **3,500 slides** before losing intensity.

For both Vintage and Reserve Stain Line Use

High Def® Acid Rinse

A glacial acid based formulation. Provides unparalleled crisp nuclear chromatin detail and eliminates any undesired background staining when used with Reserve and Vintage Hematoxylin. Premixed, safe, and ready-to-use. High-Def® is also available in a low-concentration formulation for laboratories equipped with linear stainers.

| | |
|-------------------------|-------|
| 3.5% Solution, 1 gallon | SL103 |
| 1.0% Solution, 1 gallon | SL205 |

Reserve Hematoxylin

Uniquely formulated hematoxylin stain that can be used in place of Gill or Harris hematoxylin. Does not require daily filtering or form metallic sheens. Rapidly provides unsurpassed nuclear chromatin delineation with no affinity for background or mucin staining. May be used for both histology and cytology applications.

| | |
|--------|-------|
| 500 mL | SL200 |
|--------|-------|

Reserve Bluing Reagent

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular contrast. Bluing Reagent is premixed and ready-to-use.

| | |
|----------|-------|
| 1 gallon | SL203 |
|----------|-------|

Triple Play

A proprietary mix of 3 dyes to provide excellent contrast for a clean & vibrant result. Must see to believe!

Reserve Eosin Multichrome

Proprietary formulation that provides striking contrast and brilliant staining of all cytoplasmic components. Three-dye combination provides familiar and vibrant cytoplasmic staining and differentiation. Alcoholic and acidified.

| | |
|--------|-------|
| 500 mL | SL201 |
|--------|-------|

Reserve Eosin Multichrome
Small Intestine

Classic Stain Line

Before hybrid stains, there was Harris and Gill. If you prefer one of these classic options, StatLab's line of high-quality classic stains are exactly what the doctor ordered.

Harris Hematoxylin

Modified traditional formulation. Contains no mercury. Generally used as a regressive stain, but may also be used in progressive staining protocols. Produces rapid and distinct nuclear detail.

| | |
|----------|---------|
| 500 mL | SL90-16 |
| 1 gallon | SL90-1 |

Gill 1 Hematoxylin

Low dye concentration for cytology. Used progressively, this formulation optimally stains both gynecological and nongynecological specimens. Produces exceptional nuclear clarity.

| | |
|----------|---------|
| 500 mL | SL97-16 |
| 1 gallon | SL97-1 |

Gill 2 Hematoxylin

Medium dye concentration for histology or intense cytology staining. Produces a darker nuclei, or used when shorter staining times are needed. Nuclear detail is very distinct and has great clarity.

| | |
|----------|---------|
| 500 mL | SL94-16 |
| 1 gallon | SL94-1 |

Gill 3 Hematoxylin

High dye concentration for frozen or intense histology staining. Recommended for most routine histology and frozen sections. Produces a dark and rapid nuclear stain.

| | |
|----------|---------|
| 500 mL | SL95-16 |
| 1 gallon | SL95-1 |

Treosin™

Slightly acidified combination of Eosin-Y with Orange-G and Acid Fuchsin. Suitable as replacement for routine eosin. Distinct shades of eosin easily obtained from bright red-orange (red blood cell's and fibrin deposits) to bright red (collagen fibers and skeletal muscle) to red-pink (smooth muscle). In many cases Treosin™ could eliminate the need for trichrome staining. Excellent for frozen sections.

| | |
|----------|---------|
| 500 mL | SL93-16 |
| 1 gallon | SL93-1 |

Eosin-Y, Alcoholic

Ready-to-use counterstain for routine H & E procedures. Produces a brilliant counterstain with excellent differentiation or cytoplasmic details and non-nuclear tissue components

| | |
|----------|---------|
| 500 mL | SL98-16 |
| 1 gallon | SL98-1 |

Don't forget the Diastase!

1% Ready to Use Diastase (P.A.S. Glycogen Digestion)

Alpha-amylase determines if glycogen is present in a histology tissue section.

The kits you know and love.

MasterTech manual stain kits, by StatLab.

MasterTech™ stain kits are now packaged in boxes with convenient tear-off lids, allowing you to store stains together in the box for easy access. Each kit includes instructions for use.

Deciding which control slide to use? See page 118 for a complete list of control slides.

Lids tear off at the back for simple storage.

A.F.B. Stain Kit

Stains for mycobacteria (acid fast bacteria) in less than 15 minutes.

This kit is suitable in lieu of and comparable to the Kinyoun's AFB and Ziehl-Neelsen procedures for staining all mycobacteria, including *Mycobacterium tuberculosis*. The MasterTech AFB Stain Kit differs from these procedures in that Advanced Carbol Fuchsin™ (ACF) is used for bacterial staining instead of a standard Carbol Fuchsin, and Light Green is used as a counterstain instead of Methylene Blue.

In comparison to standard Carbol Fuchsin, this kit requires no heat and has a much shorter staining time by combining all three fuchsin dyes. Light Green is a much better counterstain than Methylene Blue, as it provides higher contrast against the red stained bacteria.

Compatible Control Slide: CS-AFB/25

A.F.B. Modified Truant's Fluorescent Stain Kit

Stains for mycobacteria (acid fast bacteria) in as little as 10 minutes.

This procedure is popular in labs which have a fluorescence capable microscope, as the contrast is much greater than standard light microscope procedures. Auramine O-Rhodamine B serves as the primary stain, producing fluorescent yellow to orange bacteria against a black background produced by Eriochrome Black T.

| | | |
|------------------|-------------------|-------|
| 100ml Kit | 36-45 Slide Yield | KTMTF |

| Acid Alcohol Solution | KC3522 (pint) |
| Eriochrome Black T Stain | KC3531 (100 mL) |

Two Alcian Blue Kits to Choose From

Alcian Blue pH 2.5 Stain Kit

Stains carboxylated and sulfated acidic mucosubstances and mucins blue in 40 minutes.

This kit contains a specially formulated Nuclear Fast Red that reduces flocculation, which is not found in similar stain kits on the market. This greatly reduces staining artifacts and debris. Alcian Blue serves as the primary stain, producing vibrant blue stained mucins with the pink to red nuclei counterstained by Nuclear Fast Red.

| | | |
|------------------|---------------------|------------|
| 100ml Kit | 80-100 Slide Yield | KTABP2.5 |
| Pint Kit | 320-500 Slide Yield | KTABP2.5PT |

|------------------------|----------------|----------------|
| Alcian Blue pH 2.5 | STABL2.5100 | STABL2.5PT |
| Nuclear Fast Red Stain | STNFR100 | STNFRPT |
| 3% Acetic Acid | AHA0443 (pint) | AHA0443 (pint) |

Compatible Control Slides: CS-ALCBL/25, CSC1025P, CSS0325P

Alcian Blue-P.A.S. Stain Kit

Stains acid mucins, neutral mucins, and glycogen in 60 minutes.

This kit contains a specially formulated Optimized Schiff's solution which eliminates the sulfurous rinse step, commonly found in similar stain kits on the market. This reduces staining time and exposure to sulfite fumes. Alcian Blue and Schiff's serve as the primary stains, producing blue to purple stained acid mucins and pink to red neutral mucins or glycogen with blue nuclei counterstained by Hematoxylin.

| | | |
|------------------|---------------------|---------|

Compatible Control Slides: CS-ALCBL/25, CSC1025P, CSS0325P

Aniline Blue-Azan, Heidenhain's Stain Kit

Stains collagen, muscle, cytoplasm, chromatin, osteocytes, and neuroglia in 40 minutes.

Aniline Blue serves as the primary stain, producing blue collagen and reticulum fibers, and a pink to blue cytoplasm, with red to yellow Chromatin, neuroglia, osteocytes, and muscle, counterstained by the Azocarmine B.

| | | |
|------------------|---------------------|-------|
| 100ml Kit | 106-132 Slide Yield | KTHEI |
|------------------|---------------------|-------|

| Azocarmine B Solution | KC5611(100mL) |
| 1% Acetic Alcohol Solution | KC5632(Pint) |
| Aniline Blue Solution | KC5651(100mL) |
| Aniline Alcohol Solution | KC5621(100mL) |
| 5% Phosphotungstic Acid | AHP0626(100mL) |

Bielschowsky's Modified Stain Kit

Stains axons, intracellular neurofibrils, and senile plaques in just 35 minutes.

This kit is suitable in lieu of and comparable to the Gros-Bielschowski's, Sevier-Munger, Rio-Hortega, and Holmes' procedures for staining axons. This kit differs from these procedures by the time required, ease of use, and consistency.

The specially formulated stock developer solutions in the MasterTech kit removes the need to produce several intermediary developer solutions that add more than an hour to the procedure, involve using multiple hazardous chemicals such as concentrated nitric acid, and are extremely sensitive, translating to poor consistency. Silver Nitrate serves as both the primary stain and counterstain, producing black axons, intracellular neurofibrils, and senile plaques against a tan to gold background.

| Stock Developer Solution "C" | KT499-6 (6 mL) |

Bile Stain Kit, Hall's

Stains for bile or bilirubin in less than 15 minutes.

Oxidization of the bile with Fouchet's Reagent provides the primary stain, producing green bile or bilirubin, with pink to red collagen and a tan to yellow background of muscle and cell cytoplasm, counterstained by Van Gieson's.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 80-100 Slide Yield | KTHBI |
| Pint Kit | 320-500 Slide Yield | KTHBIPT |

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|---------------------|-----------------|---------------|
| Fouchet's Reagent | KC1011 (100 mL) | KC1012 (pint) |
| Van Gieson's Stain | STVG1100 | STVG1PT |

Brown & Brenn Stain Kit, Modified

Stains for gram positive and gram negative bacteria in just 10 minutes.

The MasterTech Brown and Brenn Stain Kit is less hazardous than similar kits due to a specially formulated Advanced Picric Acid/Acetone. Safranin O and Gentian Violet both serve as primary stains, producing blue stained gram positive bacteria, and red stained gram negative bacteria and nuclei, while the Advanced Picric Acid/Acetone provides a yellow counterstain.

Compatible Control Slides: CS-GRAM/25, CSG0225P

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 36-45 Slide Yield | KTBBR |
| Pint Kit | 144-225 Slide Yield | KTBBRPT |

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|------------------------------|-----------|----------|
| Gentian Violet | AHG0426 | AHG0443 |
| 1% Safranin O | STSFO100 | STSFOPT |

| ADVANCED Picric Acid/Acetone | KC0211 | KC0212 |
| Gram's Decolorizer | AHG0126 | AHG0143 |

Chicago Sky Blue Stain Kit

Stains for dermatomycoses such as pityriasis versicolor and dermatophytosis in 30 minutes.

In the MasterTech Chicago Sky Blue Stain Kit, the Chicago Sky-Blue Stain highlights the fungal elements blue against a colorless to pink background stained by the potassium hydroxide (KOH). This provides a strong color contrast that results in a quick, easy, and reliable way to diagnose dermatomycoses.

| | | |
|------------------|-----------------|-------|
| 100ml Kit | 500 Slide Yield | KTCSB |
|------------------|-----------------|-------|

| INCLUDES COMPONENTS | |
|------------------------------|----------------|
| Chicago Sky Blue Stain | KC712H (30 mL) |
| Potassium Hydroxide Solution | KC711H (30 mL) |

Colloidal Iron Stain Kit

Stains for acid mucosubstances in just 45 minutes.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 144-225 Slide Yield | KTCIR |
| Pint Kit | 675-900 Slide Yield | KTCIRPT |

Stains for acid mucosubstances in just 45 minutes. Working Colloidal Iron Solution is absorbed and reacts with a working Prussian Blue Solution, serving as the primary stain by producing blue acid mucosubstances against pink to red collagen counterstained by Van Gieson's.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|------------------------------------|------------------|-------------------|
| Colloidal Iron Stock | KC0311 (100 mL) | KC0312 (pint) |
| Van Gieson's Stain | STVG1100 | STVG1PT |
| 3% Potassium Ferrocyanide Solution | AHP0426 (100 mL) | AHP0443 (pint) |
| 3% Hydrochloric Acid Sol. | AHH0226 (100 mL) | AHH0243 (pint) |
| 12% Acetic Acid | KC0342 (pint) | 4, KC0342 (pints) |

Compatible Control Slides: CSC1025P, CSS0325P

Alkaline Congo Red Amyloid Stain Kit

Stains amyloid deposits in 15 minutes.

This kit is commonly used to stain for primary, secondary, myeloma-associated, or tumor-associated amyloidosis. Alkaline Congo Red Solution serves as the primary stain, producing pink to red amyloid deposits, with blue nuclei counterstained by Hematoxylin.

Compatible Control Slides: CSA0425P, CS-AMYL/25

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 36-45 Slide Yield | KTACR |
| Pint Kit | 144-225 Slide Yield | KTACRPT |

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|-----------------------------|----------------|------------------|
| Alkaline Congo Red Solution | KC7712 (pint) | KC7712 (2 pints) |
| Alkaline Alcohol Solution | KC7722 (pint) | KC7722 (2 pints) |
| Modified Mayer's Hematox. | HXMMH100 | HXMMHPT |
| Sodium Hydroxide Solution | AHS0919 (30mL) | AHS0926 (100mL) |

Congo Red Amyloid Stain Kit

Stains for amyloid deposits in just over 60 minutes.

| | | |
|------------------|------------------------------|---------|
| 100ml Kit | 320-500 Slide Yield | KTCRE |
| Pint Kit | 680-1,000 Slides Slide Yield | KTCREPT |

This kit is suitable in lieu of and comparable to the alkaline congo red method, commonly used to stain for primary, secondary, myeloma-associated, or tumor-associated amyloidosis. The MasterTech Congo Red Amyloid Kit requires no working solution preparation, making it faster and more convenient than similar kits or procedures. Congo Red Amyloid Stain serves as the primary stain, producing pink to red amyloid deposits with blue nuclei counterstained by Hematoxylin.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|------------------------------|----------------|----------------|
| Congo Red Stain | STCRE100 | STCREPT |
| Modified Mayer's Hematoxylin | HXMMH100 | HXMMHPT |
| 1% Sodium Hydroxide | AHS0943 (pint) | AHS0943 (pint) |

Compatible Control Slides: CSA0425P, CS-AMYL/25

Copper Stain Kit with Traditional and Microwave Procedure

Stains for copper in just 10 minutes.

| | | |
|------------------|-------------------------|---------|
| 100ml Kit | 680-1000 Slide Yield | KTMCO |
| Pint Kit | 1,500-2,000 Slide Yield | KTMCOPT |

This kit includes a 10 minute microwave procedure and the traditional 18 hour procedure. Rhodanine Stock Solution serves as the primary stain, producing light brown to red cytoplasmic copper granules with blue nuclei counterstained by Hematoxylin.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|--------------------------------|---------------|-----------------|
| Rhodanine Stock Stain Solution | KC132A (25mL) | KC1321 (100 mL) |
| Acetate Buffer pH 8.0 | KC1312 (pint) | KC1312 (pint) |
| Modified Mayer's Hematoxylin | HXMMH100 | HXMMHPT |

STATLAB.COM

Elastic Stain Kit, Verhoeff

Stains for elastic fibers in just 20 minutes.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 36-45 Slide Yield | KTVEL |
| Pint Kit | 144-225 Slide Yield | KTVELPT |
| Liter Kit | 306-450 Slide Yield | KTVELLT |

Used to demonstrate changes in elastic tissue such as atrophy, arteriosclerotic changes, reduplication, breaks, splitting, or to determine whether blood vessels have been invaded by a tumor. Verhoeff's working solution serves as the primary stain in this regressive method, overstained and then differentiated to produce purple to black elastic fibers and pink to red collagen against yellow background tissue counterstained by Van Gieson's.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit | Liter Kit |
|------------------------------|------------------|----------------|-----------|
| 5% Alcoholic Hematoxylin | KC2111 (100 mL) | KC2112 (pint) | KC2113 |
| 10% Ferric Chloride Solution | AHF0126 (100 mL) | AHF0143 (pint) | AHF0150 |

Fite's Stain Kit, Modified

Stains for Mycobacterium leprae and Nocardia in less than 30 minutes.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 53-66 Slide Yield | KTFIT |
| Pint Kit | 211-330 Slide Yield | KTFITPT |

This kit is commonly used to demonstrate the causative organism of leprosy. The MasterTech Fite's Stain Kit differs from similar kits/procedures in that Advanced Carbol Fuchsin™ (ACF) is used instead of a standard Carbol Fuchsin and Light Green is used as a counterstain instead of Methylene Blue. In comparison to traditional Carbol Fuchsins, ACF™ requires no heat and has a much shorter staining time by combining all three fuchsin dyes. Light Green is a much better counterstain than Methylene Blue, as it provides higher contrast against the red stained bacteria.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|--------------------------|-----------------|-------------------|
| Xylene Peanut Oil | KC2541 (100 mL) | 2, KC2542 (pints) |
| Advanced Carbol Fuchsin™ | STACF100 | STACFPT |
| Light Green Counterstain | STLGC100 | STLGCPT |
| Acid Alcohol | AHA00188E (pt) | 2, AHA00188E (pt) |

Compatible Control Slides: CS-FITE/25, CS-FITE-M/25

Fontana-Masson Stain Kit

Stains for argentaffin cells, granules, carcinoid tumors, and melanin in 60 minutes.

| | | |
|------------------|--------------------|---------|
| 100ml Kit | 28-48 Slide Yield | KTFMA |
| Pint Kit | 50-240 Slide Yield | KTFMAPT |

Argentaffin cells possess the ability to bind and reduce silver to a visible metal without requiring a reducing agent, allowing this stain to be performed with fewer steps than other silver stains. An Ammoniacal Silver Developer Solution serves as the primary stain, producing brown to black melanin granules against a pink to red background counterstained by Nuclear Fast Red.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|-------------------------|------------------|-------------------|
| Type 1 Silver Solution* | KC398V (5 vials) | KC398K (20 vials) |
| 0.1% Gold Chloride | AHG0226 (100 mL) | AHG0243 (pint) |
| 5% Sodium Thiosulfate | AHS0326 (100 mL) | AHS0343 (pint) |
| Nuclear Fast Red Stain | STNFR100 | STNFRPT |

Compatible Control Slides: CS-MELA/25, CSS0825P

* Visit the kit product page on StatLab.com to watch a video with step-by-step preparation for Ammoniacal Silver used in this stain kit (Type 1 Silver Solution)

G.M.S. Stain Kit

Stains for fungi and Pneumocystis jirovecii in just 15 minutes.

This kit includes a 15 minute microwave procedure and the traditional one hour and thirty minute procedure. The MasterTech G.M.S. Stain Kit is suitable in lieu of and comparable to the Grocott Methenamine Silver Technique. The MasterTech G.M.S. Stain Kit differs from this technique through the use of a stabilized, pre-measured Methenamine Silver Compound, instead of Methenamine Borate, Hexamine, or Silver Nitrate Solutions. This benefits the end user through ease of use and a longer shelf life. A Methenamine Silver Solution serves as the primary stain, with Gold Chloride toning the tissue sections, producing gray to black fungi and Pneumocystis jirovecii against a green background counterstained with Light Green.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 20-32 Slide Yield | KTGMS |
| Pint Kit | 100-400 Slide Yield | KTGMSPT |

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|------------------------------|------------------|----------------------------|
| Methenamine Silver Compound* | KT093F (5 vials) | 2, KT093C (20 vials total) |
| 5% Chromic Acid | KC0911 (100 mL) | KC0912 (pint) |
| 1% Sodium Bisulfite | KC0941 (100 mL) | KC0942 (pint) |
| 0.3% Gold Chloride | KC0921 (100 mL) | KC0922 (pint) |

Compatible Control Slides: CS-FUNGUS/GMS/25, CS-PNEU/25, CSP0125P

Giemsa Stain Kit, Optimized™

Stains bone marrow and Helicobacter pylori in under 15 minutes.

Over the past decade, the dye content for Giemsa stain has changed dramatically during the manufacturing process, reducing the polychromatic qualities in Giemsa stains. The MasterTech Optimized Giemsa Stain Kit™ restores these meta-chromatic qualities within the dye through the development of a specially formulated Giemsa Buffer, providing excellent staining results. Giemsa serves as the primary stain, producing blue to purple nuclei, cytoplasm, and Helicobacter.

Compatible Control Slides: CSH0125P, CS-HELI/25

| | | |
|-----------------|---------------------|---------|
| Pint Kit | 340-620 Slide Yield | KTOGIPT |
|-----------------|---------------------|---------|

INCLUDES COMPONENTS

| | |
|--------------------------|-------------------|
| Giemsa Stain Stock | STGIEPT |
| Optimized Giemsa Buffer™ | 5, BUG1043 (pint) |

Giemsa/May-Grunwald Bone Marrow Stain Kit

Stains bone marrow, core sections, mast cells, and Helicobacter pylori in 25 minutes.

This procedure is used to differentiate cells present in hematopoietic tissue. Both May-Grunwald and Giemsa Stock serve as primary stains, producing blue to purple nuclei, cytoplasm, Helicobacter pylori, and mast cells.

Compatible Control Slides: CSH0125P, CS-HELI/25

| | | |
|-----------------|----------------|---------|
| Pint Kit | 54 Slide Yield | KTGMGPT |
|-----------------|----------------|---------|

INCLUDES COMPONENTS

| | |
|--------------------------|----------------|
| Giemsa Stain Stock | STGIEPT |
| May-Grunwald Stain Stock | STMGRPT |
| 6.8pH Phosphate Buffer | BUP1043 (pint) |

Gram Stain Kit, Mcdonald's™

Stains for gram positive and gram negative bacteria in less than five minutes.

This kit is suitable in lieu of and comparable to the Brown and Brenn, Brown and Hopps, and Modified Gram Methods for staining gram positive and gram negative bacteria. The MasterTech Gram Stain Kit differs from these procedures in that Carbol Fuchsin is used instead of Safranin and Optimized Tartrazine is used instead of traditional Tartrazine. Carbol Fuchsin intensifies the stain, while the Optimized Tartrazine provides more intense staining in less time.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 36-45 Slide Yield | KTMGS |
| Pint Kit | 144-225 Slide Yield | KTMGSPT |

The kit is also safer to use than the traditional procedures because the hazardous Gallego's differentiating solution and picric acid/acetone is eliminated. The results are identical to the Brown & Brenn stain without the exposure to hazardous chemicals. Both Gentian Violet and Carbol Fuchsin serve as the primary stains, producing blue gram positive bacteria and red gram negative bacteria against a yellow background, counterstained by Optimized Tartrazine.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|------------------------------------|------------------|----------------|
| Gentian Violet | AHG0426 (100 mL) | AHG0443 (pint) |
| Universal Iodine Solution | STUIO100 | STUIOPT |

| Carbol Fuchsin | KC3211 (100 mL) | KC3212 (pint) |
| Optimized Tartrazine Counter Stain | KC3251 (100 mL) | KC3252 (pint) |

Compatible Control Slides: CS-GRAM/25, CSG0225P

Helico*Stat® Stain Kit, Rapid Helicobacter

Stains for Helicobacter pylori in 25 minutes.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 53-66 Slide Yield | KTHST |
| Pint Kit | 211-300 Slide Yield | KTHSTPT |

This kit is suitable in lieu of and comparable to Alcian Yellow/Toluidine Blue Helicobacter pylori stains such as the Leung and Gibbon's Technique. The Helico*Stat® Stain Kit differs from these procedures by using true Alcian Yellow dye instead of an alternative. This provides excellent contrast between the organism and mucin. Toluidine Blue serves as the primary stain, producing blue H. pylori and background against yellow mucins, counterstained by Alcian Yellow.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|-------------------------------|-----------------|----------------|
| Periodic Acid, 1% | AHP0943 (pint) | AHP0943 (pint) |
| Alcian Yellow Solution | KC3731 (100 mL) | KC3732 (pint) |
| 3% Sodium Hydroxide | AHS0613 (10 mL) | AHS0619 (pint) |
| Sodium Metabisulfite Solution | KC3741 (100 mL) | KC3742 (30 mL) |
| Toluidine Blue Stock | KC372J | KC372H (30 mL) |

Compatible Control Slides: CS-HELI/25, CSH0125P

Hepatitis B Stain Kit

Stains for Hepatitis B surface antigen (HBsAg) in two hours and thirty minutes.

Orcein Stain serves as the primary stain, differentiated to produce red to brown aggregates in the cytoplasm of hepatocytes and Kupffer cells against a yellowish brown background.

| | | |
|------------------|-------------------|-------|
| 100ml Kit | 53-66 Slide Yield | KTHEP |
|------------------|-------------------|-------|

INCLUDES COMPONENTS

| | |
|--------------------------------|------------------|
| 5% Potassium Permanganate | KC111H (30 mL) |
| 3% Sulfuric Acid | KC115H (30 mL) |
| 2% Oxalic Acid Solution | AHO1126 (100 mL) |
| Orcein Stain | KC1141 (100 mL) |
| Differentiating Sol. (Alcohol) | KC1121 (100 mL) |

Herovici's Collagen Stain Kit

Stains for young and mature collagen in less than 10 minutes.

This kit is used to differentiate young and mature collagen as well as stain reticulum. Herovici's Working solution stains young collagen and reticulum blue and mature collagen red while providing a yellow cytoplasm counterstain. Nuclei are stained blue to black with Weigert's Hematoxylin.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 36-45 Slide Yield | KTHER |
| Pint Kit | 144-225 Slide Yield | KTHERPT |

INCLUDES COMPONENTS

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|-----------------------------|------------------|----------------|
| Herovici's Stain Solution A | KC6411 (100 mL) | KC6412 (pint) |
| Herovici's Stain Solution B | KC6421 (100 mL) | KC6422 (pint) |

| Weigert's B Hematoxylin | HXWHEB100 | HXWHEBPT |
| 1% Acetic Acid | AHA0326 (100 mL) | AHA0343 (pint) |

Iron Stain Kit

Stains ferric iron in under 30 minutes.

| | | |
|-------------------|-------------------------|----------|
| 100ml Kit | 80-100 Slide Yield | KTIRO |
| Pint Kit | 320-500 Slide Yield | KTIROPT |
| Gallon Kit | 2,800-3,800 Slide Yield | KTIROGAL |

This kit is suitable in lieu of and comparable to the Perl's Technique and Gomori's Iron Reaction for staining ferric iron. The MasterTech Iron Stain is less hazardous than these procedures and provides more precise results by using lower strength Hydrochloric Acid and Potassium Ferrocyanide. A Working Prussian Blue Solution serves as the primary stain, producing blue ferric iron against a pink to red background with red nuclei, counterstained by Nuclear Fast Red.

Compatible Control Slides: CS-IRON(L)/25, CSF0225P

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit | Gallon Kit |
|---------------------------|----------------|--------------------|----------------------|
| 3% Potassium Ferrocyanide | AHP0443 (pint) | 2, AHP0443 (pints) | 2, AHP0457 (gallons) |
| 3% Hydrochloric Acid | AHH0243 (pint) | 2, AHH0243 (pints) | 2, AHH0257 (gallons) |
| Nuclear Fast Red Stain | STNFR100 | STNFRPT | STNFRGAL |

Jones Stain Kit With Microwave Procedure

*Stains basement membrane
and reticulum fibers in just
20 minutes.*

This kit includes a 20 minute microwave procedure and the traditional one hour and thirty minute procedure. This kit is suitable in lieu of and comparable to the Periodic Acid/Methenamine Silver Procedure for Basement Membranes. The MasterTech Jones Stain Kit differs from this procedure by using Nuclear Fast Red as a counterstain instead of Light Green, which provides better contrast. A Methenamine Silver Solution serves as the primary stain, with Gold Chloride toning the tissue sections, producing gray to black basement membranes and reticulum fibers against a pink to red background with red nuclei, counterstained by Nuclear Fast Red.

| | | |
|------------------|--------------------|---------|

Luxol Fast Blue Cresyl Echt Violet Stain Kit

*Stains myelin sheaths and
nissl substances in one hour
and fifteen minutes.*

MasterTech's improved Luxol Fast Blue Stain Kit contains a specially formulated Luxol Fast Blue stain that reduces staining time to one hour and fifteen minutes, while most other kits on the market take over two hours! Both Luxol Fast Blue and Cresyl Echt Violet serve as primary stains, producing vibrant blue myelin fibers, with dark blue nissl substances and blue nuclei.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 53-66 Slide Yield | KTLFB |

Muci Plus Stain Kit™

*Stains epithelial mucins
in just 20 minutes.*

This kit is suitable in lieu of and comparable to the Mayer Mucicarmine method for staining mucins. The MasterTech Muci Plus Stain Kit™ contains a specially formulated Mucicarmine stain known as Muci-10-Plus™ that dramatically reduces primary staining time to 10 minutes, while most other kits on the market take an hour. Muci-10-Plus™ serves as the primary stain, producing pink to red epithelial mucins. Hematoxylin acts as a secondary stain, producing blue to black nuclei against a yellow background, counterstained by Metanil Yellow.

| | | |

Picro-Sirius Red Stain Kit

Stains collagen and muscle in just over one hour.

This kit is suitable in lieu of and comparable to various Van Gieson's staining procedures. Picro-Sirius Red serves as the primary stain producing red collagen and yellow muscle, with black nuclei stained by Weigert's Hematoxylin A and B. Furthermore, when viewed under a polarized light, thick fibers produce yellow to orange birefringence while thin fibers are green. Even without a polarized light, Picro-Sirius Red demonstrates reticular fibers and basal lamina of cerebral capillaries, which often are not observed in a Van Gieson's stain and can be masked by other stained structures in trichrome procedures such as Mallory, Masson, and Heidenhain.

| | | |

Reticulum Stain Kit, Chandler's Precision®

Stains reticulum fibers with no background staining in 30 minutes.

This kit is suitable in lieu of and comparable to the Gomori, Gordon and Sweets, Snook's, Laidlaw's, Wilder's, Modified Gridley's, and Foot's technique staining for Reticular Fibers, often performed during the differential diagnosis of various types of tumors or liver disease. In addition to being much shorter than many of these procedures, the MasterTech Kit does not use radioactive Uranyl Nitrate, or cumbersome Lithium Silver solutions. With easy to use,

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 30-112 Slide Yield | KTCPR |
| Pint Kit | 120-480 Slide Yield | KTCPRPT |

pre-measured Silver Solution vials and a specially formulated Nuclear Fast Red that reduces flocculation, this kit will produce vibrant nuclei and contrasting reticulum fibers with a background free of staining artifacts and debris. An Ammoniacal Silver Developer Solution serves as the primary stain, producing brown to black reticulum fibers against a pink to red background counterstained by Nuclear Fast Red.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |

Trichrome Stain Kit, Masson's, with Microwave Procedure

Stains for collagen and muscle in one hour and ten minutes.

| | | |
|------------------|---------------------|---------|
| 100ml Kit | 80-100 Slide Yield | KTMTR |
| Pint Kit | 320-500 Slide Yield | KTMTRPT |

Trichrome stains are commonly used to identify increases in collagenous tissue to assist in the diagnosis of diseases such as liver cirrhosis. This kit includes a one hour and 10 minute microwave procedure and the traditional one hour and forty minute procedure. For a lower hazard alternative without Bouin's Fluid that provides similar results, try the Masson's 2000 Trichrome Stain Kit below. Biebrich Scarlet/Acid Fuchsin and Aniline Blue serve as the primary stains, producing red cytoplasm, intercellular fiber, keratin, and muscle, blue collagen and mucus, with purple to black nuclei, counterstained by Weigert's Hematoxylin.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |
|-------------------------------------|------------------|----------------|
| Bouin's Fluid | FXBOU100 | FXBOUPT |
| Biebrich Scarlet/Acid Fuchsin | AHB0426 (100 mL) | AHB0443 (pint) |
| Phosphomolybdic/Phoshotungstic Acid | AHP0526 (100 mL) | AHP0543 (pint) |

| 1% Acetic Acid | AHA0326 (100 mL) | AHA0343 (pint) |
| Weigert's Hematoxylin A | HXWHEA100 | HXWHEAPT |
| Weigert's Hematoxylin B | HXWHEB100 | HXWHEBPT |

Trichrome Stain Kit, Masson's 2000 (Low Hazard)

Stains for collagen and muscle in 25 minutes.

| | | |
|------------------|---------------------|----------|
| 100ml Kit | 80-100 Slide Yield | KTMTR2 |
| Pint Kit | 320-500 Slide Yield | KTMTR2PT |

Trichrome stains are commonly used to identify increases in collagenous tissue to assist in the diagnosis of diseases such as liver cirrhosis. This kit includes a 30 minute microwave procedure and the traditional two hour procedure. The Masson's 2000 Stain Kit is a low hazard alternative to the traditional Masson's Trichrome Stain Kit which uses Bouin's Fluid. Instead, a specially formulated Bouin's 2000™ is used, that is free of both formaldehyde and picric acid. Biebrich Scarlet/Acid Fuchsin and Aniline Blue serve as the primary stains, producing red cytoplasm, intercellular fiber, keratin, and muscle, blue collagen and mucus, with purple to black nuclei, counterstained by Weigert's Hematoxylin.

| INCLUDES COMPONENTS | 100mL Kit | Pint Kit |

Compatible Control Slides: CS-TRI-L/25, CS-TRI-C/25, CST0125P

Trichrome One-Step Stain Kit

Stains for collagen and muscle in less than 30 minutes.

The MasterTech One-Step Trichrome Kit makes staining collagen or muscle fast and easy. Unlike traditional one-step procedures, Modified Mayer's Hematoxylin is used instead of Weigert's Hematoxylin, eliminating the need for unnecessary steps, while making this kit ready-to-use. One Step Trichrome serves as the primary stain, producing pink to red cytoplasm, intercellular fiber, keratin, and muscle, blue or green collagen and mucus, depending on the Trichrome color chosen, and blue nuclei stained by Mayer's Hematoxylin.

STAINS

Warthin-Starry Stain Kit, Modified Stat, with Microwave Procedure

Stains cat scratch fever, H. pylori, L. pneumophila, and spirochetes in 15 minutes.

This kit includes a 15 minute microwave and traditional procedure. This kit is suitable in lieu of and comparable to the traditional Warthin-Starry Stain. This kit differs from the traditional procedure by incorporating optimized reagents which allows the MasterTech Warthin-Starry Staining time to be reduced to just 15 minutes instead of more than two hours. Silver Nitrate, developed by the Hydroquinone based reducing solution serves as the primary stain, producing dark brown to black cat scratch fever, Helicobacter pylori, Legionella pneumophila, and spirochetes against a yellow to brown background.

Wright-Giemsa Stain Kit

Stains for blood and blood parasites in 10 minutes.

This procedure has been optimized for differential staining of blood smears and identifying blood parasites. Wright-Giemsa Stain serves as the primary stain producing pink to tan red blood cells, bluish-purple white blood cells and leukocytes, light purple or lavender neutrophils, bright red granule eosinophils, deep purple or violet granule basophils and reddish-purple granule platelets. The Wright-Giemsa Stain kit includes a procedure for routine and stat staining and includes the necessary buffer.

| Phosphate Buffer 6.8 pH | BUP1043 (pints) |

Melanin Bleach Kit

Bleaches melanin from skin in less than an hour.

The Melanin Bleach Kit is commonly used to bleach Melanin in tissue so that other cells that look like Melanin can be distinguished and observed when stained. This kit is fast and effective in removing melanin from hair, skin, retina or substantia nigra of the brain. In comparison to other bleach kits, the MasterTech Melanin Bleach Kit is safer to use because it does not contain hazardous sulfuric acid.

Stain Rinses

Choose from several StatLab acid rinse options. Each possesses varying degrees of intensity. Please call StatLab's Technical Support team for information about the impact of each rinse and assistance in selecting the optimal rinse for your application.

Vintage Bluing Reagent

(Scotts Tap Water Bluing Substitute)

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular contrast. Bluing Reagent is premixed and ready-to-use. Looking for a Scotts Tap Water Bluing substitute? This is it!

| | |
|----------|-------|
| 1 gallon | SL102 |
|----------|-------|

Select Bluing Reagent

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular hue staining. Select Bluing Rinse is premixed, ready-to-use and tinted blue for easy identification.

| | |
|----------|-------|
| 1 gallon | SL403 |
|----------|-------|

Reserve Bluing Reagent

A buffered alkaline rinse with a mild pH (8.0). Ensures optimal staining and proper cellular contrast. Bluing Reagent is premixed and ready-to-use.

| | |
|----------|-------|
| 1 gallon | SL203 |
|----------|-------|

1% Focus™ Acid Alcohol

Contains hydrochloric acid in 70% reagent grade alcohol. Used to remove excess stain and to produce better defined nuclei. Available in 0.5% and 1.0% formulations.

| | |
|-------------------------|---------|
| 1.0% Solution, 1 pint | SL89-16 |
| 1.0% Solution, 1 liter | SL89-32 |
| 1.0% Solution, 1 gallon | SL89-1 |

Deionized Water

Reagent for all standard pathology laboratory applications.

| | |
|-----------------------|----------|
| 1 gallon 4/case | SL30-1 |
| 2.5 gallon cubitainer | SL30-2.5 |
| 5 gallon cubitainer | SL30-5 |

0.5% Focus™ Acid Alcohol

Contains hydrochloric acid in 70% reagent grade alcohol. Used to remove excess stain and to produce better defined nuclei. Available in 0.5% and 1.0% formulations.

| | |
|-------------------------|--------|
| 0.5% Solution, 1 gallon | SL88-1 |
|-------------------------|--------|

High Def® Acid Rinse

For use with Vintage, Reserve, and ClearView Stains

A glacial acid based formulation. Provides unparalleled crisp nuclear chromatin detail and eliminates any undesired background staining when used with Reserve and Vintage Hematoxylin. Premixed, safe, and ready-to-use. High-Def® is also available in a low-concentration formulation for laboratories equipped with linear stainers.

| | |
|-------------------------|-------|
| 3.5% Solution, 1 gallon | SL103 |
| 1.0% Solution, 1 gallon | SL205 |

Select Acid Rinse

For use with the Select Stain Line

Produces unparalleled crisp nuclear chromatin detail and eliminates undesirable background staining. Utilizes a buffer system to prevent pH fluctuation. Premixed and ready-to-use. Non-hazardous.

| | |
|----------|-------|
| 1 gallon | SL404 |

STAINS

Stain Accessories

StatLab's line of practical accessories help your staining procedures move along smoothly.

Trans-Prep™ 5-Slide Jar

Trans-Prep™ 5-Slide Jars are made of transparent HDPP and are excellent for a variety of laboratory tasks. Great for FNA's or special staining and for microwave enhanced protocols. Use as a pap jar, filled with 95% alcohol or as a mailer for slides. The stable base structure reduces tips and spills and thick walls ensure durability and longevity. The friction fit threaded cap is virtually leak proof.

| | |
|--------|-------|
| 1 each | CJ616 |
|--------|-------|

Glass Coplin Jars

60 mL capacity, Poly screw-cap. Holds 5 slides vertically.

| | |
|---------------|--------|
| 90 mm, 6/case | 900570 |
|---------------|--------|

Filter Paper

Ahlstrom Filtration. Fast flow. Qualitative. Rough surface, 0.25 mm thick with a flow rate of 235 mls/min. Filters to 25 microns.

| | |
|-------------------|-----------|
| 20.5 cm, 100/pack | 6150-2050 |
| 33 cm, 100/pack | 6150-3300 |

Slide Drying Rack

Acrylic slide rack, inclined, used for draining/drying slides. 10 slots accommodate 50 slides. 8.2W x 8.5D x 2.0H (front) x 4.45H (rear).

| | |
|--------|-------|
| 1 each | SL670 |
|--------|-------|

Staining Dish with Cover

Staining Dish with Cover - made from soda lime glass, accommodates 25-30 slide rack. (118 mm x 88 mm x 70 mm)

| | |
|--------|----------|
| 1/each | 900303EA |
|--------|----------|

Metal Staining Rack

30 slide stainless steel slide rack with handle.

| | |
|--------|--------|
| 3/case | 900234 |
|--------|--------|

Stain Accessories

Certified for Accuracy

4-Channel Alarm-Timer/Stopwatch

Large display permits viewing from across the lab. Timer has a capacity of 99 hours, 59 minutes, and 59 seconds, and can be switched to a 12- or 24-hour clock. Can lay flat or use flip-open stand for a vertical view. Features a certificate of calibration.

1/each EQT641

LabAlert Triple Timer

Three channels to count up/down with simultaneous display, time out, and 60 second audible alarm. Channels may be started independently, or simultaneously. 86mm x 66mm x 22mm

1/each HS24490M

Manual Slide Staining Sets

Acid proof holder, made of stainless steel. Plastic dishes with lid, resistant to alcohol, xylene, toluene and staining solutions. Removable plastic dishes, steel covers. Stain rack with plastic handle.

| | |
|---|-------|
| Stainless steel holder, 12 dishes 300mL, 1/each | 10-10 |
| Stainless steel holder, 3 troughs 300mL, 1/each | 10-20 |
| Plastic stain rack, 1/each | 10-42 |
| Individual plastic dish, 300mL 1/each | 10-30 |

Control Slides

Validate the stains you run every day with StatLab's wide variety of competitively priced, high-quality control slides.

Quality. Consistency.

StatLab Control Slides

A STATLAB
PATENTED
TECHNOLOGY

Bioengineered Controls

TruQ Bioengineered TMA Controls feature the look of tissue with the consistency of cell lines.

Tissue Controls

Human tissue, ready for comparison.

Cell Line Controls

Consistency you can count on.

StatLab control slides consist of formalin fixed, paraffin embedded sections which contain known distinctive tissue elements.

Use these slides with confidence to evaluate stain quality and performance in histology laboratories.

- ✓ Control slides on Millennia adhesion white glass slides
- ✓ 90° corners
- ✓ FFPE sections
- ✓ Each package includes specific staining protocol

Helping labs meet CAP recommendations and pathologists' preferences.

TruQ™ Bioengineered Tissue Microarray (TMA) Controls deliver the first reference-standard control that meets CAP recommendations for on-slide positive and negative IHC controls—with the look of tissue.

Consistent

Delivers consistent immunoprofiles, cellular polarity, and standardized antigen expression in every block—every time—providing complete control over verification and validation. Each lot of TruQ is externally tested and verified for consistency by a CAP-accredited laboratory.

Easy to Use

Bioengineered controls contain the same stromal appearance and morphology as tissue, eliminating the need for additional training. Ready-to-use slide and block controls require no changes to fixation or processing protocols and accommodate the existing workflow of both low and high-volume laboratories.

Valuable

Eliminates a time-consuming search to replace exhausted tissue blocks when tissue is not readily available – and for labs making their own blocks, allows histotech resources to focus on improved patient care and other high-value activities in the laboratory.

Inexhaustible

Prevents disruption by ensuring a reliable source for access to controls with known marker expression profiles. The manufacturing process for bioengineered controls means laboratories can rely on inexhaustible, consistent controls.

All products available in slide and block format. Biomarkers can be customized and developed upon request. Please contact us for more information.

Tissue controls will always vary slightly in biomarker expression, and consume valuable histotech resources to procure and manage. Cell line controls do not look like tissue, serving as an ineffective substitute for tissue controls.

TruQ[™] Bioengineered TMA Controls are the answer.
In use by leading cancer institutions.

CliniSciences Group

Advanced Diagnostics

Whether manual or auto staining,
we have what you need to begin IHC
staining in your lab.

Antibodies

StatLab offers a wide range of mouse monoclonal, rabbit monoclonal, and rabbit polyclonal RTU (Ready to Use) antibodies.

Antibodies are optimized with StatLab's detection systems for use on formalin-fixed paraffin embedded tissues, frozen sections, and cytological samples.

Q *Optimized for the Quantum HDx™*

IVD *In Vitro Diagnostic Use*

RTU ASR *Ready to Use Analyte Specific Reagent*

RTU RUO *Ready to Use Research Use Only*

IVD Actin Muscle Specific ITEM NUMBER

| | | | | |
|-------|-------------|------------|--|------------|
| 2 mL | Clone HHF35 | Monoclonal | | SAM-MM01-2 |
| 10 mL | Clone HHF35 | Monoclonal | | MM01-10 |

IVD Actin Smooth Muscle (SMA)

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone 1A4 | Monoclonal | | SAM-MM03-2 |
| 10 mL | Clone 1A4 | Monoclonal | | MM03-10 |

IVD Q Actin Smooth Muscle (SMA)

| | | | | |
|-------|-----------|------------|--|----------------|
| 2 mL | Clone 1A4 | Monoclonal | | SAM-QHD-MM03-2 |
| 15 mL | Clone 1A4 | Monoclonal | | QHD-MM03-15 |

IVD Actin Sarcomeric

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone 5D5 | Monoclonal | | SAM-MM02-2 |
| 10 mL | Clone 5D5 | Monoclonal | | MM02-10 |

IVD Alpha Fetoprotein (AFP)

| | | | | |
|-------|----------|------------|--|------------|
| 2 mL | Clone C3 | Monoclonal | | SAM-MM04-2 |
| 10 mL | Clone C3 | Monoclonal | | MM04-10 |

IVD Amyloid A Component

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone mc1 | Monoclonal | | SAM-MM05-2 |
| 10 mL | Clone mc1 | Monoclonal | | MM05-10 |

IVD Androgen Receptor (AR)

| | | | | |
|-------|--------------|------------|--|------------|
| 2 mL | Clone AR 441 | Monoclonal | | SAM-MM06-2 |
| 10 mL | Clone AR 441 | Monoclonal | | MM06-10 |

IVD Bcl-2

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone 124 | Monoclonal | | SAM-MM09-2 |
| 10 mL | Clone 124 | Monoclonal | | MM09-10 |

IVD C4d

| | | | | |
|------|--------------|------------|--|------------|
| 2 mL | Clone C4d204 | Monoclonal | | SAM-MM11-2 |
| 6 mL | Clone C4d204 | Monoclonal | | MM11-6 |

IVD CA15.3

| | | | | |
|-------|-------------|------------|--|------------|
| 2 mL | Clone DBMM1 | Monoclonal | | SAM-MM12-2 |
| 10 mL | Clone DBMM1 | Monoclonal | | MM12-10 |

IVD Calcitonin

| | | | | |
|-------|--|------------|--|------------|
| 2 mL | | Polyclonal | | SAM-RP04-2 |
| 10 mL | | Polyclonal | | RP04-10 |

IVD CD1a

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone O10 | Monoclonal | | SAM-MM17-2 |
| 10 mL | Clone O10 | Monoclonal | | MM17-10 |

IVD CD4

| | | | | |
|-------|-------------|------------|--|---------|
| 10 mL | Clone EP204 | Monoclonal | | RM27-10 |
|-------|-------------|------------|--|---------|

IVD CD5

| | | | | |
|-------|-----------|------------|--|------------|
| 2 mL | Clone 4C7 | Monoclonal | | SAM-MM31-2 |
| 10 mL | Clone 4C7 | Monoclonal | | MM31-10 |

IVD Q CD7

| | | | | |
|-------|-------------|------------|--|-------------|
| 15 mL | Clone EP132 | Monoclonal | | QHD-RM95-15 |
|-------|-------------|------------|--|-------------|

IVD CD8 T-Cell

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone 144B | Monoclonal |  | SAM-MM39-2 |
| 10 mL | Clone 144B | Monoclonal |  | MM39-10 |

IVD CD10

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone 56C6 | Monoclonal |  | SAM-MM14-2 |
| 10 mL | Clone 56C6 | Monoclonal |  | MM14-10 |

IVD Q CD10

| | | | | |
|-------|------------|------------|---|----------------|
| 2 mL | Clone 56C6 | Monoclonal |  | SAM-QHD-MM14-2 |
| 15 mL | Clone 56C6 | Monoclonal |  | QHD-MM14-15 |

IVD CD15

| | | | | |
|-------|-----------|------------|---|------------|
| 2 mL | Clone MMA | Monoclonal |  | SAM-MM16-2 |
| 10 mL | Clone MMA | Monoclonal |  | MM16-10 |

IVD CD20

| | | | | |
|--------|-----------|------------|---|------------|
| 2 mL | Clone L26 | Monoclonal |  | SAM-MM07-2 |
| 10 mL | Clone L26 | Monoclonal |  | MM07-10 |
| 25 mL | Clone L26 | Monoclonal |  | MM07-25 |
| 100 mL | Clone L26 | Monoclonal |  | MM07-100 |

IVD Q CD20

| | | | | |
|-------|-----------|------------|--|----------------|
| 2 mL | Clone L26 | Monoclonal |  | SAM-QHD-MM07-2 |
| 15 mL | Clone L26 | Monoclonal |  | QHD-MM07-15 |

IVD CD21, B cell

| | | | | |
|-------|-----------|------------|---|------------|
| 2 mL | Clone 1F8 | Monoclonal |  | SAM-MM18-2 |
| 10 mL | Clone 1F8 | Monoclonal |  | MM18-10 |

IVD CD23

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone 1B12 | Monoclonal |  | SAM-MM20-2 |
| 10 mL | Clone 1B12 | Monoclonal |  | MM20-10 |

IVD CD25

| | | | | |
|-------|--------------|------------|---|------------|
| 2 mL | Clone IL2R.1 | Monoclonal |  | SAM-MM21-2 |
| 10 mL | Clone IL2R.1 | Monoclonal |  | MM21-10 |

IVD CD30/Ki-1

| | | | | |
|-------|--------------|------------|---|------------|
| 2 mL | Clone Ber-H2 | Monoclonal |  | SAM-MM23-2 |
| 10 mL | Clone Ber-H2 | Monoclonal |  | MM23-10 |

IVD CD31

CONCENTRATED

| | | | | |
|------|--------------|------------|---|---------|
| 1 mL | Clone JC/70A | Monoclonal |  | MM24-01 |
|------|--------------|------------|---|---------|

READY TO USE

| | | | | |
|-------|--------------|------------|---|------------|
| 2 mL | Clone JC/70A | Monoclonal |  | SAM-MM24-2 |
| 10 mL | Clone JC/70A | Monoclonal |  | MM24-10 |

IVD CD34

| | | | | |
|-------|----------------|------------|---|------------|
| 2 mL | Clone QBEND/10 | Monoclonal |  | SAM-MM26-2 |
| 10 mL | Clone QBEND/10 | Monoclonal |  | MM26-10 |

IVD Q CD34

| | | | | |
|-------|----------------|------------|---|----------------|
| 2 mL | Clone QBEnd/10 | Monoclonal |  | SAM-QHD-MM26-2 |
| 15 mL | Clone QBEnd/10 | Monoclonal |  | QHD-MM26-15 |

IVD CD43

| | | | | |
|-------|-------------|------------|---|------------|
| 2 mL | Clone DF-T1 | Monoclonal |  | SAM-MM28-2 |
| 10 mL | Clone DF-T1 | Monoclonal |  | MM28-10 |

IVD CD44/H-CAM

| | | | | |
|-------|----------------|------------|---|------------|
| 2 mL | Clone 156-3C11 | Monoclonal |  | SAM-MM29-2 |
| 10 mL | Clone 156-3C11 | Monoclonal |  | MM29-10 |

IVD CD45 LCA

| | | | | |
|-------|-------------------|------------|---|------------|
| 2 mL | Clone 2B11+PD7/26 | Monoclonal |  | SAM-MM96-2 |
| 10 mL | Clone 2B11+PD7/26 | Monoclonal |  | MM96-10 |

IVD CD45RO T Cell

| | | | | |
|-------|-------------|------------|---|-------------|
| 2 mL | Clone UCHL1 | Monoclonal |  | SAM-MM136-2 |
| 10 mL | Clone UCHL1 | Monoclonal |  | MM136-10 |

IVD CD56

| | | | | |
|-------|-----------------|------------|---|------------|
| 2 mL | Clone 1213C3.D5 | Monoclonal |  | SAM-MM32-2 |
| 10 mL | Clone 1213C3.D5 | Monoclonal |  | MM32-10 |

IVD CD57

| | | | | |
|-------|-----------|------------|---|------------|
| 2 mL | Clone NK1 | Monoclonal |  | SAM-MM33-2 |
| 10 mL | Clone NK1 | Monoclonal |  | MM33-10 |

IVD CD61

| | | | | |
|-------|-------------|------------|---|------------|
| 2 mL | Clone Y2/51 | Monoclonal |  | SAM-MM34-2 |
| 10 mL | Clone Y2/51 | Monoclonal |  | MM34-10 |

IVD CD68

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone KP-1 | Monoclonal |  | SAM-MM36-2 |
| 10 mL | Clone KP-1 | Monoclonal |  | MM36-10 |

IVD Q CD68

| | | | | |
|-------|------------|------------|---|----------------|
| 2 mL | Clone KP-1 | Monoclonal |  | SAM-QHD-MM36-2 |
| 15 mL | Clone KP-1 | Monoclonal |  | QHD-MM36-15 |

IVD CD74

| | | | | |
|------|-----------|------------|---|------------|
| 2 mL | Clone LN2 | Monoclonal |  | SAM-MM37-2 |
| 2 mL | Clone LN2 | Monoclonal |  | MM37-10 |

Antibodies

IVD CD79a

| | | | | |
|-------|--------------|------------|---|------------|
| 2 mL | Clone HM47/A | Monoclonal |  | SAM-MM38-2 |
| 10 mL | Clone HM47/A | Monoclonal |  | MM38-10 |

IVD CD99/MIC2, Ewing's Sarcoma Marker

| | | | | |
|-------|----------------|------------|---|------------|
| 2 mL | Clone HO36-1.1 | Monoclonal |  | SAM-MM40-2 |
| 10 mL | Clone HO36-1.1 | Monoclonal |  | MM40-10 |

IVD CDX2

| | | | | |
|--------|------------|------------|---|-------------|
| 2 mL | Clone EP25 | Monoclonal |  | SAM-RM160-2 |
| 10 mL | Clone EP25 | Monoclonal |  | RM160-10 |
| 25 mL | Clone EP25 | Monoclonal |  | RM160-25 |
| 100 mL | Clone EP25 | Monoclonal |  | RM160-100 |

| | | | | |
|---------|------------|------------|---|--------------|
| Q 15 mL | Clone EP25 | Monoclonal |  | QHD-RM161-15 |
|---------|------------|------------|---|--------------|

IVD CEA (M)

| | | | | |
|-------|-------------|------------|---|------------|
| 2 mL | Clone Col-1 | Monoclonal |  | SAM-MM41-2 |
| 10 mL | Clone Col-1 | Monoclonal |  | MM41-10 |

IVD Chromogranin A

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone SP12 | Monoclonal |  | SAM-RM25-2 |
| 10 mL | Clone SP12 | Monoclonal |  | RM25-10 |

IVD Cyclin E Protein

| | | | | |
|-------|------------|------------|---|------------|
| 2 mL | Clone HE12 | Monoclonal |  | SAM-MM44-2 |
| 10 mL | Clone HE12 | Monoclonal |  | MM44-10 |

IVD Cytokeratin (45,46,56.5)

| | | | | |
|-------|--------------|------------|---|------------|
| 2 mL | Clone MNF116 | Monoclonal |  | SAM-MM48-2 |
| 10 mL | Clone MNF116 | Monoclonal |  | MM48-10 |

IVD Cytokeratin (AE1/AE3) (Pan-cytokeratin)

| | | | | |
|------|---------------|------------|---|------------|
| 2 mL | Clone AE1+AE3 | Monoclonal |  | SAM-MM45-2 |
|------|---------------|------------|---|------------|

| | | | | |

ON YOUR TEAM

New to IHC? We can help.

Our growing technical support team and your local rep work together to develop and support IHC staining solutions for laboratories performing manual and semi-automated staining. We help you get up and running, providing everything you need to begin IHC staining in your lab—from products to protocols. We're on your team.

ADVANCED DIAGNOSTICS

Automated and Semi-Automated Detection Kits

MOM DAB (HRP) Kit Ultra High Def™ (Mouse on Mouse)

10ml Kit P1-MOM-10HRP

INCLUDES COMPONENTS

Ultra High Def™ Peroxidase/AP Block
 Mouse on Mouse (MOM) Blocking Reagent
 Ultra High Def™ Anti-mouse Polymer
 Ultra High Def™ DAB Buffer
 Ultra High Def™ DAB Chromogen
 Empty mixing bottle for Stable DAB/Plus

Mouse DAB (HRP) Kit Ultra High Def™

100ml Kit P1-M-100-HRP-KIT

INCLUDES COMPONENTS

Ultra High Def™ Peroxidase/AP Block
 Ultra High Def™ Background Blocker
 Ultra High Def™ Polymer Mouse-HRP
 Ultra High Def™ DAB Buffer
 Ultra High Def™ DAB Chromogen
 Ultra High Def™ Hematoxylin

Universal Kit

DAB (HRP) Kit Ultra High Def™

MANUAL 10ml P2-U-10-MANUAL-HRP
 AUTO 20ml P2-U-20-AUTO-HRP
 100 mL P2-U-100-HRP-Kit

INCLUDES COMPONENTS

Ultra High Def™ Peroxidase/AP Block
 Ultra High Def™ Enhancer
 Ultra High Def™ Background Blocker
 Ultra High Def™ Polymer HRP (anti-mouse/rabbit)
 Ultra High Def™ DAB Buffer
 Ultra High Def™ DAB Substrate Chromogen
 Ultra High Def™ Hematoxylin (only 20ml kit)

Universal Kit

Red (AP) Kit Ultra High Def™

MANUAL 10ml P1-U-10-AP-KIT
 AUTO 20ml P1-U-20-AUTO-AP
 100 mL P1-U-100-AP-Kit

INCLUDES COMPONENTS

Ultra High Def™ Peroxidase/AP Block (only 20ml kit)
 Ultra High Def™ Background Blocker (only 20ml kit)
 Ultra High Def™ Polymer AP (anti-mouse/rabbit)
 Ultra High Def™ AP-Red Buffer
 Ultra High Def™ AP-Red Chromogen
 Ultra High Def™ Hematoxylin (only 20ml kit)

DAB (HRP) Kit

Q Quantum HDx

100 tests per kit QHD-U3-15-HRP-KIT

INCLUDES COMPONENTS

| | |
|-------------------------------|----------|
| Quantum HD Dewax Solution 1 | 2, 15 mL |
| Quantum HD HRP Polymer A | 15 mL |
| Quantum HD HRP Polymer B | 15mL |
| Quantum HD HRP Polymer C | 15 mL |
| Quantum HD DAB Substrate (2x) | 7.5 mL |
| Quantum HD DAB Chromogen (2x) | 7.5 mL |
| Quantum HD Hematoxylin | 15 mL |

Red (AP) Kit

Q Quantum HDx

100 tests per kit QHD-U2-15-AP-KIT

INCLUDES COMPONENTS

| | |
|------------------------------|----------|
| Quantum HD Dewax Solution 1 | 2, 15 mL |
| Quantum HD Polymer Enhancer | 15 mL |
| Quantum HD AP Polymer 2 | 15 mL |
| Quantum HD AP Substrate | 7.5 mL |
| Quantum HD AP Chromogen (2x) | 7.5 mL |
| Quantum HD Hematoxylin (2x) | 15 mL |

Intense Red (AP) Kit

Q Quantum HDx

Provides a more intense red signal.

100 tests per kit QHD-U2-15-APx-KIT

INCLUDES COMPONENTS

| | |
|-------------------------------|----------|
| Quantum HD Dewax Solution 1 | 2, 15 mL |
| Quantum HD Polymer Enhancer | 15 mL |
| Quantum HD AP Polymer 2x | 15 mL |
| Quantum HD Red Substrate (2x) | 7.5 mL |
| Quantum HD Red Chromogen (2x) | 7.5 mL |
| Quantum HD Hematoxylin | 15 mL |

Components

| DESCRIPTION | VOLUME | ITEM NUMBER |
|--|--------|--------------|
| Ultra High Def™ Polymer Mouse/Rabbit HRP | 10 mL | P1-U-10-HRP |
| Ultra High Def™ Polymer Mouse/Rabbit HRP | 100 mL | P1-U-100-HRP |
| Ultra High Def™ Polymer Mouse/Rabbit AP | 10 mL | P1-U-10-AP |
| Ultra High Def™ Background Block | 100 mL | ACR-006 |
| Ultra High Def™ Peroxidase Block | 100 mL | ACR-017 |
| UHD Peroxidase/AP blocker | 100 mL | ACR-023 |
| Ultra High Def™ Hematoxylin | 100 mL | ACR-027 |

Chromogens

Ultra High Def™ Black *HRP*

| | |
|--------|-------------|

| 30 mL | CRM-003-30 | 30 mL | CRM-002-30 |
| 110 mL | CRM-003-110 | 110 mL | CRM-002-110 |

Ultra High Def™ Red *HRP and AP*

| HRP | | AP | |
|--------|---------------|--------|-------------|
| 30 mL | CRM-007-30/2 | 30 mL | CRM-005-30 |
| 110 mL | CRM-007-110/2 | 110 mL | CRM-005-110 |

Ancillary Products

StatLab antigen retrieval reagents, blocking & wash buffers, diluents, and mounting medium are optimized to yield high quality staining for automated and manual IHC.

Q Quantum HD Retrieval Solution

Antigen Retrieval

Q Quantum HDx Retrieval Solution High pH (TR1)

100 tests QHD-003

Q Quantum HDx Retrieval Solution Low pH 6.0 (TR2)

100 tests QHD-002

Q Quantum HDx Retrieval Solution High pH 9.0 (TR4)

100 tests QHD-003

10X Antigen Retrieval Buffer High pH 10.0

500 mL ACR-001

10X Citrate Buffer, pH 6.0

500 mL ACR-002

Ancillary

Q Quantum HDx Block

50 tests QHD-006

Q Quantum HDx Dewax Solution 2 (DS2-50)

50 tests QHD-007

Q Quantum HDx DAB Enhancer

50 tests QHD-008

Primary Antibody Diluent

250 mL ACR-018

Ultra-High-Def™ DAB

5/200 m ACR-021

Ultra-High-Def™ DAB Amp (20x)

10 mL conc. ACR-004

Ultra-High-Def™ Alk. Phos. Amp

250 mL ACR-005

10X EDTA Retrieval Buffer, pH 8.0

500 mL ACR-031

10X Tris-EDTA Retrieval Buffer, pH 9.0

500 mL ACR-003

Universal Enzyme Retrieval

15 mL ACR-013-15

50 mL ACR-013-50

Proteinase K

2 mL ACR-019

Pepsin

50 mL ACR-020

Tween 20

125 mL ACR-035

Wash Reagent

Q Quantum HDx Wash Buffer, 20x

1 L QHD-015

007 Immuno Wash Buffer, 10x

1 L ACR-024

Immuno Wash Buffer, 10x

1 L ACR-015

Mayer's Hematoxylin

1 Pint HXMMHPT

1 Gallon HXMMHGAL

Q Quantum HDx Wash Buffer, 20x

Automated Accessories

A full line of accessories for both manual processing as well as for use on the Quantum HDx™ platform.

Q Quantum HD Small Chamber

Quantum Chamber Drying Rack

Q Quantum HDx Small Chamber (120mL)
Pack of 10 QHD-CH120-10

Q Quantum HDx Antibody Vials 15 ml (Clear)
Pack of 10 QHD-AV15C-10

Q Quantum HDx Fluorescent Vials 15ml (Black)
Pack of 10 QHD-AVIF15-10

Q Quantum HDx Antibody Vials 7 ml (Clear)
Pack of 10 QHD-AV7C-10

Q Quantum HDx Fluorescent Vials 7ml (Black)
Pack of 10 QHD-AVIF7-10

Q Labels, Xylene Resistant
Roll of 1,000 labels QHD-XRLBL-RL

Q Ribbon, Xylene Resistant
Roll QHD-RIBBON

Q Quantum HDx Chamber Drying Rack
Each SL-675

Q Quantum HDx Reagent Rack
Each QHD-035

Q Quantum HDx Cap Rack
Each QHD-036

Alcohol Swabs
Pack QHD-034

Quantum Maintenance and Care

Q Quantum HDx Tubing Cleaning Kit
Kit QHD-033

Q Quantum HDx Chamber Cleaning Solution
1 Gallon QHD-QCS-1

Q Quantum HDx Antibody Vials 15 ml (Clear)

Q Quantum HDx Fluorescent Vials 15ml (Black)

Q Quantum HDx Antibody Vials 7 ml (Clear)

Q Quantum HDx Fluorescent Vials 7ml (Black)

Broad Spectrum Negative Control

Manual Accessories

IHC Stain Tray with Clear Lid - 20 slide

Manual IHC staining tray, capacity 20 slides, black with lid.

1/each

M920-1

Elite PAP Pen - broad point

Liquid blocker, broad point, suitable for both immunohistochemical and fluorescent staining, hydrophobic properties allow the user to draw barriers on the slide, to confine the flow of reagents to a defined area.

1/each

ACR-012

Mini Elite PAP Pen - fine point

Liquid blocker, fine point, suitable for both immunohistochemical and fluorescent staining, hydrophobic properties allow the user to draw barriers on the slide, to confine the flow of reagents to a defined area.

1/each

ACR-016

Low density P/E wash bottle, 16 oz with blue spout

| | |
|--------|-----------|
| 1 each | 116270500 |
|--------|-----------|

Hydriion, Plastic pH Indicator Strips 5.5 - 8.0 (100)

See page 176 for a selection of filtered pipette tips

Cytology

Produce consistent and accurate results with ease from collection to prepared slide with StatLab's complete line of cytology stains, reagents and accessories.

Cytology Stains and Fixatives

You can count on the performance of these stains formulated from top-grade, certified raw materials that have been tested to meet the industry's highest standards.

Finished-good testing involves analytical, qualitative and quantitative analysis to ensure quality, longevity and lot-to-lot consistency. All stain products are ready-to-use and require no dilution. StatLab's family of cytology stains will give you optimal results when used together under the recommended guidelines.

Cytology Stains

EA-50

Classic formula for routine cytoplasmic staining of gynecological and non-gynecological specimens.

| | |
|----------|---------|
| 500 mL | SL91-16 |
| 1 gallon | SL91-1 |

Modified EA-50

A popular substitute for EA-65. Contains twice as much Eosin-Y than EA-50 and no Bismark Brown.

| | |
|----------|---------|
| 500 mL | SL96-16 |
| 1 gallon | SL96-1 |

EA-65

Alcohol-based, for routine cytoplasmic staining

| | |
|--------|-------|
| 500 mL | SL302 |
|--------|-------|

A Timesaver!

This easy, one-step cytoplasmic stain saves labor and reagent costs by eliminating multiple steps.

Reserve Cyto-DX Stain

Provides familiar color hues associated with cytology smears. Can be used for all gynecological and non-gynecological specimens.

| | |
|--------|-------|
| 500 mL | SL304 |
|--------|-------|

OG-6

A modified formulation used in combination with the EA series to stain keratinized cells in all gynecological and non-gynecological specimens. This formulation eliminates common chemical precipitation associated with traditional OG products.

The StatLab "Diff"erence

Our best-selling rapid stain for the past 40 years! Excellent for FNA cytology, differential staining of blood smears, microbiological organisms, H. pylori, and bone marrow specimens.

Versatile, very economical and the traditional StatLab formulation. Available in a kit for easy purchasing!

Hema-Diff™ Stain Kit

Includes 500ml of Fixative, Xanthene, Thiazine

1 Kit 11970-16

Hema-Diff™ Rapid Differential Stain

Three-step procedure for differential staining of blood smears and used extensively in FNA cytology. The entire procedure takes **30 seconds** as air dried specimens are fixed in Solution I then dipped in Solutions II and III. Can also be used as a special stain for *Helicobacter pylori*.

Unlock your options with StatPrep™

Don't be locked into brand-name liquid-based cytology consumables. Meet the **StatPrep™ cytology collection system** for gyn, urine, and FNA specimens.

Compatible, high-quality solutions

The StatPrep™ collection system works together with your existing liquid-based cytology processor and testing to produce consistent, reliable results.

Filters you can count on

StatPrep™ ultra-thin, micro-porous polycarbonate membrane films are manufactured in a clean room environment. Membranes are blasted with accelerated heavy ions creating a highly consistent, specific pore size. Further processing ensures an ultra-thin surface that is chemically etched to assure consistent cellular results.

Why switch?

Utilizes common collection protocols that providers are already using for liquid-based cytology

May be used for out of the vial testing once your laboratory has validated the StatPrep™ collection system for use with these tests

Appropriate for use with **fine-needle aspiration, urine, and gynecologic specimens**

Cost savings provide relief in an environment of declining reimbursements.

All StatPrep™ products are FDA-registered

CytoStat-Red

CytoStat™ Red Collection Fluid is an alcohol-based general purpose fixative solution. CytoStat™ Red is used for diagnostic non-gynecological cytology specimens, which include, but are not limited to, sputum, washings, body fluids, scrapings, and fine needle aspiration biopsies. This fixative lyses red blood cells and solubilizes proteins while preserving the diagnostically relevant cells.

Cyt-o-Dot Pens

Cyt-o-dot cytology pens—designed for ink application on glass slides, coverslips, after staining. Durable, acrylic fiber nib is beveled to a precise, fine point. The ink line or 'dot' applied is the ideal size for microscopic visualization. Fine tip cytology markers are permanent, waterproof, and write on almost any surface including glass, plastic, ceramic and metal. 4/pack

Labeling & Tracking Solutions

Complete solutions and equipment designed to promote accuracy and reduce errors to provide the highest quality of patient care.

PathSmart™ Tracking System

Imagine a lab...where your samples are tracked during every step of the histology process.

Imagine a lab...where all of your slide and cassette printers are controlled and managed from a single point.

Imagine a lab...where your equipment and processes are intuitively connected, allowing your lab to perform to its optimal abilities.

PathSmart™ isn't just a tracking solution, it is a solution that transforms your lab to be faster, smarter, and more connected.

You're In Control

Managing your PiSmart printers has never been easier. Standardize templates for printing while configuring, managing and updating your PiSmart printers all from the SmartHub Module. Connectivity in your lab is made stronger as your equipment is linked together with additional tracking points throughout the lab.

Lifetime Access

PathSmart™ comes bundled with every PiSmart printer and includes lifetime access to the SmartHub module. Simply install the software on your PC and within minutes you can update and manage all PiSmart printers in the lab with ease.

A Smarter Workflow

PathSmart™ provides you with a real-time view of all printer and sample activity in the lab, connecting easily into established workflows, and improving them with intuitive tracking capabilities. PathSmart™ elevates your workflow and creates a management solution that controls all of your PiSmart equipment while connecting your processes. You might say, it's as easy as Pi.

CliniSciences Group

PiSmart Cassette and Slide Printers

On-demand printer solutions from StatLab support a streamlined process between grossing and microtomy, sharing a similar interface to make training simple.

PiSmart One or Six Hopper Cassette Printer

PISMART1HOPPER, PISMART6HOPPER

Designed for either on-demand or batch printing, the PiSmart Cassette Printers offer more functionality with a footprint small enough to operate at a grossing workstation. Users can select cassettes from any hopper via the user interface, or automatically by scanning 2D barcodes with the integrated scanner. Incoming image or text data can be analyzed by the printer to determine cassette color and type to prompt the user to change hoppers. Hoppers are easy to change, simply sliding on and off.

PiSmart Slide Printer

PISMART-S2

The PiSmart S2 Slide Printer is small, fast, and quiet. Dual hoppers allow simultaneous use of both adhesion and non-adhesion slides for flexibility. The fully-integrated barcode scanner can be utilized with the intelligent slide selection system which will trigger the right slide based on the sample type listed in the barcode information. Low-maintenance and high reliability means more up-time for the laboratory. A simple interface makes training easy.

Optional PiSmart StatSwap Service Agreement

Peace of mind to keep your PiSmart printers protected, and your lab running smoothly.

Within 24 hours of contacting us, a technical team member will contact you to perform virtual troubleshooting. If any problem persists, StatLab will coordinate next-day shipment of a replacement certified and refurbished PiSmart printer directly to your laboratory.

PiSmart Slide Printer with PathSmart Tracking Solution

An on-demand slide printing solution to increase laboratory automation, maximize throughput, and fit into LEAN workflows.

The PiSmart Slide Printer with PathSmart Tracking Solution incorporates two hoppers for pre-loading different slide types, holding a total of 144 slides. An integrated barcode scanner means no separate scanning hardware is needed. The Intelligent Slide Selection (ISS) functionality automatically determines the microscope slide required for individual samples by analysing the label/print image and pulling it from the correct hopper for printing. The included PathSmart tracking solution provides a single management point for all printers in the lab, making user management and template development and deployment easy and intuitive.

An additional manual load option provides an easy way to print additional slides for a case or use slide types not currently available in either stacked hopper.

Printer Specifications

| | |
|----------------------------------|---|
| Dimensions (DxWxH) | 13 x 6.4 x 16 in (330 x 163 x 406 mm) |
| Weight | 16 lbs |
| Power Requirements | Universal 100 -240 VAC. 1.5A Max. |
| Slide Tolerances | 76 - 76.2mm x 25.55 - 26mm x 1 - 1.20mm |
| Print Speed | 3-5 seconds per slide |
| Print Resolution | 300 dpi |
| Media Type & Capacity | Thermal Transfer Ribbon 1 roll completes approx. 12,000 prints |
| Connectivity | Ethernet, USB-A (2), USB-B (1) |

Features

- ✓ Small footprint allows the printer to sit on the grossing bench next to the microtome
- ✓ Fast, 3 second printing time
- ✓ Superior print quality produces a dark, durable print with excellent contrast
- ✓ Reliable operation reduces potential downtime in the lab
- ✓ Flexible connectivity options and simple LIS integration allows labs to use existing interfaces

Distributed by
CliniSciences Group

High Resolution Touch Screen Monitor

A high-resolution touch screen display with an intuitive menu structure makes the printer easy to learn and use.

Label Design Solutions

The PiSmart Slide Printer's software is capable of fully designing a slide label's sample information. This includes text, linear barcodes, and 2D barcodes. Simply scan a cassette barcode or send a text file from the LIS system and the slide printers do the rest; designing and printing the slide with unique information to properly identify patient samples.

Fully Integrated Barcode Scanner

A fully integrated barcode scanner automates data entry. A simple scan of a barcode can log users in and out of the system or create a new slide label for printing.

Convenient Slide Dispenser

When slides have been printed, they are dispensed via a chute that provides the easy pick-up of the microscope slide.

Small Footprint

The small size of the printer allows it to sit on the grossing bench next to the microtome and tissue section bath. This increases the laboratory's efficiency and accuracy through on-demand printing.

StatLab recommends Millennia Command™ Adhesion Microscope Slides for use with the PiSmart Slide Printer

Strong adhesion of the Millennia Command™ slide meets the rigorous demands of IHC processing, and the low background staining makes them an ideal choice for both special and H&E staining and a true all-purpose slide.

Fully Integrated Barcode Scanner, meaning there is no need for an external scanner.

Excellent Print Quality - the durable dark print provides excellent contrast and ensures near-perfect scan rates.

PiSmart Six

PISMART6HOPPER

Designed for either on-demand or batch printing, the **PiSmart Six** offers more functionality with a footprint small enough to operate at a grossing workstation. Users can select cassettes from any hopper via the user interface, or automatically by scanning 2D barcodes. Incoming image or text data can be analyzed by the printer to determine cassette color and type to prompt the user to change hoppers. Hoppers are easy to change, simply sliding on and off.

PiSmart Single Plus

PISMART1HOPPER

Designed for on-demand printing, the **PiSmart Single Plus** can deliver the first printed cassette in as little as 3 seconds. Feature options provide the ability to select cassettes from the hopper, prompt to change hoppers, or manually insert a single cassette, bypassing the hopper. Incoming image or text data can be analyzed by the printer to determine cassette color and type to prompt the user to change hoppers or insert a cassette.

Simple and Flexible

- Each cassette prints in 3–5 seconds, the fastest available print time
- Small footprint makes it a practical fit next to your grossing station
- True on-demand printing; print what you need, when you need it

Accurate

- Built-in scanner and label design software - no PC required
- 2D barcode printing empowers downstream applications including slide printing
- User login and tracking helps create traceability for root cause analysis

High Quality

- Print up to 85 characters on each cassette face in high-quality 300 dpi; 70% more characters than other printers
- Pi Cassette patented design ensures printing is not compromised during dewaxing
- Dark, dense printing that doesn't smear

Connectivity

The intuitive interface on the PiSmart Cassette Printer allows for cassettes to be printed immediately with just a few clicks. Data received by the scanner or delimited text file can be converted easily to a label using our internal label design software—**no PC required**. The PiSmart Cassette Printer is compatible with LIS using our WHQL certified Windows Driver. Printing is easy and automatic using bitmap or delimited file formats. Print via USB through use of a customer-supplied PC or print server and ethernet connection.

StatLab ESPO

On-Demand Slide Printer

Stop relying on handwritten labeling for important patient data. The **StatLab ESPO slide printer** is easy to use, provides efficiency for your busy lab, and offers flexibility to print on slides pre-mounted with tissue.

Efficiency

The StatLab ESPO slide printer offers 2 high-volume slide cartridges holding a total of 200 slides, and pre-filled slide cartridges are available to further increase efficiency. A touchscreen interface provides intuitive guidance to make it easy, whether you're printing a single control slide or continuously printing.

Accuracy

Up to a 5.9% error rate across labs is attributed to accessioning and labeling.¹ Use the StatLab ESPO slide labeling system and gain confidence in the accuracy of your labeling by eliminating errors due to illegible handwriting.

Empower your lab with the StatLab ESPO printer

- ✓ 2d and 3d barcode printing
- ✓ LIS compatible
- ✓ Up to 20 slides per minute
- ✓ Small footprint
- ✓ USB/Wireless connectivity
- ✓ Front loading option

Slide Label Printing

StatLab offers a full line of slide labels that are ideally suited for most histological and cytological staining procedures. These labels are stain and solvent resistant, are available in various dimensions, thicknesses, surface treatments, and are optimized to work with a specific label printer.

We also can support custom imprinted labels, sequential, and bar coded. Please ask your account manager for more information.

Zebra-compatible products are compatible with all thermal transfer printers.

Ribbons

PiSmart Cassette Printer Ribbon

25mm x 300m, 2 rolls/box P21021-E

Slide Printer Ribbons

ESPO Slide Printer ribbon with take up spool

25mm x 300m, 2 rolls/box ESP-G05

Thermal Transfer print ribbon for Thermo SlideMate, and Slide Mate AS printers.

25mm x 300m, 2 rolls/box SMHFT300/2

26mm x 300m, 2 rolls/box SMHFT300/2-AS

Hot Foil Tape

Thermal transfer ribbon, used for automated cassette printing. Prints up to 20,000 cassettes per roll. Designed for use on TBS SHUR/Mark® cassette printers and Thermo MicroWriter® cassette printers.

1.125" x 400' per roll, 6 rolls/case

Product Guide: Matte or Gloss?

Matte or Gloss labels are a personal preference for each laboratory. Each has benefits and disadvantages, with Gloss labels leading as the first choice for many labs, paired with lasting Resin Ribbon.

GLOSS

Benefits:

Dark, lasting printing, scratch-proof

Disadvantages:

May smear immediately after printing

MATTE

Benefits:

No smudging, scratch-proof

Disadvantages:

Not as dark, tends to fade over time

Direct Thermal Heat-Activated Labels

No ribbon needed, excellent for on-demand printing for vials, requisitions, and other applications where liquid or chemical resistance is not needed.

A microscopic image of tissue, likely a histology slide, showing cellular structures in shades of red and blue. The image is used as a background for the top half of the page.

Small Histology Equipment

StatLab carries a growing line of small capital equipment for the histology lab, designed to promote quality, efficiency, and safety.

Small Histology Equipment

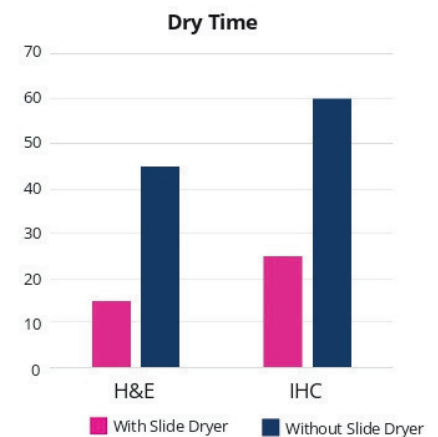

StatLab's innovative portfolio of small laboratory equipment is designed with a small footprint for strategic placement in the lab workflow.

High Capacity Slide Dryer

Designed to give maximum drying capacity for high workload laboratories. Holds up to 390 slides when used without the optional racks, and 240 when used with the rack and timers. Reduce drying time by up to 70% with this circulating air dryer.

Specifications

| | |
|---|---|
| High Capacity Slide Dryer | SI-SDR-HC |
| Dimensions | 18.3in x 12.6in x 13.2in (D x W x H) 465mm x 320mm x 335mm (D x W x H) |
| Weight | 33.7 lbs (15.3Kg) |
| Power Requirements | 220V/240V a.c. 50-60Hz |
| 4 Rack Timer Unit (1-4), sold separately | SL-SDR-TMR1 |
| 4 Rack Timer Unit (5-8), sold separately | SL-SDR-TMR2 |
| 8 Slide Rack Holder, sold separately | SL-SDR-HLDR |

Features

- ✓ Designed for use at the microtome for improved LEAN workflow
- ✓ Fan assisted heating reduces section drying time to approximately 10 minutes, compared to 35-40 minutes when using conventional ovens
- ✓ Ultra-fast heating system for rapid warm up
- ✓ Digital temperature control guarantees heat accuracy within the chamber
- ✓ Anti-microbial powder coat finish
- ✓ Integrated miniature circuit breakers increase safety and eliminate the need for replacement fuses

CliniSciences Group

High Capacity Paraffin Dispenser

The StatLab High Capacity Paraffin Dispenser has a substantial 15L capacity, designed to satisfy the demands of high volume laboratories that require constant on-demand supply of paraffin. This dispenser has two separate 7.5L tanks which can be operated independently to provide greater flexibility. Having two separate tanks also encourages LEAN laboratory workflows and improves efficiency. One tank can be ready for paraffin dispensing while the other is in the process of melting, resulting in no downtime.

Designed to rapidly warm up, which means melted paraffin in 30 minutes, and heated nozzles to help prevent clogging from hardened paraffin.

Specifications

| | |
|---------------------------|---|
| Item Number | SI-PWD-LG |
| Dimensions | 16.6in x 14in x 18in (D x W x H) 420.5mm x 358mm x 454.5mm (D x W x H) |
| Weight | 22 lbs (10.0Kg) |
| Power Requirements | 110V/230V a.c. 50-60Hz |

Slimline Paraffin Dispenser

The novel design of the StatLab Slimline Paraffin Dispenser ensures a minimal requirement for bench space, while maintaining a large 7.5L capacity tank for melting up to 6kg of pelletized paraffin at a time. Like the high capacity version, it also includes rapid warm up and heated nozzles to help prevent clogging from hardened paraffin.

Specifications

| | |
|---------------------------|--|
| Item Number | SI-PWD-SM |
| Dimensions | 16.6in x 7in x 17in (D x W x H) 420.5mm x 181mm x 435.5mm (D x W x H) |
| Weight | 15.4 lbs (7.0Kg) |
| Power Requirements | 110V/230V a.c. 50-60Hz |

StatLab Small Equipment

StatLab's small equipment is highly accurate, reliable and easy to use. They are specifically designed to avoid potential specimen damage, with an anti-microbial coating to inhibit the growth of bacteria and viruses.

Slimline Slide Drying Hot Plate

The Slimline Slide Drying Hotplate is designed to efficiently dry paraffin tissue sections through the use of a digital temperature control. An ultra-fast heating system ensures a rapid warm up time prior to use and removes stubborn wrinkles in paraffin sections.

Specifications

| | |
|---------------------------|--|
| Item Number | SI-SDH-SLIM |
| Dimensions | 7.2in x 17.7in x 3.4in (D x W x H) 183mm x 450mm x 85.5mm (D x W x H) |
| Weight | 4.4 lbs (2.2Kg) |
| Power Requirements | 110V/230V a.c. 50-60Hz |

Stainless Steel Lid (sold separately)

| | |
|--------------------|------------|
| Item Number | SI-SDH-LID |
|--------------------|------------|

Mini Slimline Hot Plate

Designed with a small footprint, ideal for use at the microtome. It is primarily used to remove stubborn wrinkles from tissue sections and re-orientating embedded tissue. It may also be used in microbiology for heat fixing bacterial smears.

Specifications

| | |
|---------------------------|---|
| Item Number | SI-SDH-MINI |
| Dimensions | 5.7in x 5.7in x 2.6in (D x W x H) 145mm x 145mm x 65mm (D x W x H) |
| Power Requirements | 110V/230V a.c. 50-60Hz |

Workflow Friendly

Small equipment works best when it's as close as possible to the workflow activities surrounding it. The space saving designs and small, SlimLine options make this portfolio ideal for laboratories driven by efficient workflow practices.

Why choose StatLab small equipment?

- ✓ Space saving design to minimize footprint
- ✓ Easy to use
- ✓ Easy to clean
- ✓ Anti-microbial coating
- ✓ Manufactured in the UK with high quality materials

Digital Tissue Section Bath

The digital model incorporates an innovative digital control that accurately maintains water temperature and allows tissue sections to be efficiently flattened. It also incorporates an extra deep 90mm bowl to allow slides to be fully dipped at an angle without touching the bottom.

Specifications

| | |
|---------------------------------|--|
| Digital Tissue Water Bath | SI-TWB-RND |
| Dimensions | 14.6in x 11.6in x 5.3in (D x W x H) 370mm x 295mm x 135mm (D x W x H) |
| Weight | 22 lbs (10.0Kg) |
| Power Requirements | 110V/230V a.c. 50-60Hz |
| Water Bath Lid, sold separately | SI-TWB-RND-LID |

Block Trimmer+

Efficiently removes excess paraffin from the outside of a tissue cassette following embedding. The edges and writing surface of the tissue cassette are de-waxed effortlessly by pressing the paraffin block across the patterned heated work surface.

Specifications

| | |
|--------------------|--|
| Item Number | SI-TBT-PLUS |
| Dimensions | 8in x 6in x 7.2in (D x W x H) 202mm x 152mm x 183.5mm (D x W x H) |
| Weight | 5.0 lbs (3.0Kg) |
| Power Requirements | Dual Voltage 110V/230V a.c. 50-60Hz |

General Laboratory

Keep your laboratory safe and
organized with these helpful products.

Cassette & Slide Storage

Efficient, cost-effective storage for slides and blocks, to help manage compliance with long-term storage guidelines. Smart and durable construction make these an easy choice.

SafeStore Hybrid Slide or Block Storage

Economical interlocking corrugated construction. Easy to set up. Tabs allow stacking. 4 drawer file holds approximately 2,000 slides. 8 drawer file holds approximately 500 tissue blocks.

| | |
|--|-------|
| 4 Drawer slide file, 10/case | FS4 |
| 8 Drawer block file, 10/case | FS8 |
| 8 Drawer block file, fully assembled, 5/each | FS8/5 |

Fiberboard Block Storage File (shown below)

Simple, stackable storage files come unassembled, 25 per case.

| | |
|--------------------------------------|--------------|
| Case of 25 Unassembled Storage Files | WCB-0400-08F |
|--------------------------------------|--------------|

Corrugated Block Storage (Not shown)

This file has a total of 16 individual rows, with each row able to accommodate up to 20 paraffin blocks. Each file will accommodate a total of up to 320 blocks. The cabinet also has an outer sleeve which enables secure protection and transport.

| | |
|-------------------------------|---------|
| Block Storage Cabinet, 1/each | BVC-8R |
| Block Storage Sleeve, 1/each | BVC-SLV |

SVFS-B

Slide Vault Storage Cabinet

Metal, stackable, interlocking, with baked enamel finish. 6 drawers per cabinet, with no plastic inserts needed to separate slides. Polished brass knobs facilitate easy storage and retrieval of slides.

| | |

Spill Control

Bestseller!

FormaGuard™ Formalin Neutralizing Pads

FormaGuard™ Pads provide an effective way for lab personnel to guard against formaldehyde vapors and exposure by allowing formalin penetration into a highly absorbent core. The FormaGuard™ Pad is light blue, rigid, polycoated, and roughly 1/8" in thickness.

| | |
|-----------------------------|----------|
| Small (8" x 11"), 25/pack | FGP0811 |
| Medium (11" x 15"), 25/pack | FGP1115 |
| Large (15" x 20"), 25/pack | FGP1520 |
| Roll, each 13 1/2" X 30' | FGP13530 |

FormaGuard™ Pads

Bestseller!

Fan Pad-GL™ Formalin Neutralizing Pads

Specially treated pad that absorbs formaldehyde. After absorption, formaldehyde is converted to a non-hazardous polymer eliminating harmful vapors. Fan Pad minis are also especially useful in the clean up of small formalin spills.

| | |
|--|--------|
| Mini (11" x 10 3/4"), 55/roll, 6 rolls /case | FAN55 |

GENERAL LABORATORY

Activated Carbon Filters

For a variety of popular laboratory instrument brands.

Effective

Filters contain high grade activated carbon which will absorb most organic and inorganic vapors including xylene, toluene, methanol, formalin, isopropyl alcohol and industrial denatured alcohol.

Unbeatable Value

These products are identical in size and shape to their comparable original manufacturer filters, and are an easy drop-in replacement. Change filters at manufacturer-recommended intervals to keep your laboratory and staff safe.

Transfer Pipettes

Disposable. Practical and economical. 3 mL, low density, polyethylene. Non-sterile.

| | |
|---------|--------|
| 500/box | CT2000 |
|---------|--------|

Grossing Pipettes

Disposable 3 mL pipette with large aperture. Used for easy removal of small specimens from fixative containers and to facilitate transfer into cassette. Protects delicate specimens where forcep removal may damage tissue.

| | |
|---------|------------|
| 500/box | CT2000-CUT |
|---------|------------|

Transfer Pipettes

Grossing Pipettes

Parafilm™ M Self-Sealing Flexible Film

Made of a semi-transparent, flexible and water-proof material, film is resistant to most acids and alcohols

| | |
|----------------|-------|
| 2" x 250' roll | PM992 |
|----------------|-------|

| | |
|----------------|-------|
| 4" x 150' roll | PM996 |
|----------------|-------|

Formalin Warning Label

Pressure sensitive, permanent adhesive. Satisfies OSHA 1910.1200 (f) requirements. Right side of label provides space for patient name, date, DOB, specimen ID, and doctor.

| | |
|------------|-------|
| 1,000/roll | FL1X3 |
|------------|-------|

Pinfed Slide Labels

Die-cut 15/16" x 15/16", 6 across. Carrier width 7". Packaged 25,000 per box. Fan-folded and perforated between each row.

| | |
|-------------------------|-------|
| 1,000/each - 25,000/box | MLPF6 |
|-------------------------|-------|

Contamination Control Floor Mat

Adhesive backed, white contamination control mats. Effectively removes dirt/dust/ paraffin from shoes, wheels, and rollers. 36" x 45". 30 peel away layers per mat.

| | |
|-------------|----------------|
| 8 mats/case | 100-93-364538W |
|-------------|----------------|

Safe Cube Dispenser

Safe Cube Dispenser, spill containment device with alarm.

| | |
|--------|---------|
| 1/EACH | SCD100A |
|--------|---------|

STATLAB.COM

Personal Protective Equipment

Now more than ever, keep your team safe from hazardous solutions and pathogens with StatLab personal protective equipment.

Golden Care Blue Nitrile Gloves

Blue, finger textured, beaded cuff, powder-free. FDA510K, ASTM D6319 certified.

| | |
|------------------|-------------|
| Large, 100/box | GCARE-92398 |
| X-Large, 100/box | GCARE-92399 |

Colbat Nitrile Gloves

Colbat nitrile gloves offer consistent comfort and durability. Fully textured for enhanced grip and dependable protection. Designed to enhance tactile sensitivity. Sold by the case, 10 boxes/case.

| | |
